摘要: 这次世界性疫情发病率多,时间长,范围广,至少由五个方面原因。如为病人注射药水针或挂水输液治病。在当时 1931 年美国医生 drbaxbr 与同伴合作在改造后的旧车库内,生产出世界上第一瓶商业用输液产品,在第二次世界大战中被大量应用于很多伤员脱水,或流血过多,或发烧及伤口被病菌感染进行抢救治疗。如输液三十小时内使病人立即退烧,感染伤口西药上去,特别对病菌立即见好效果等。在当时短时间内发现不了对慢性病及对病毒,长期输液使用后的副作用问题。

Abstract: This worldwide epidemic has a high incidence rate, a long time and a wide range, which is caused by at least five reasons. For example, injection of liquid medicine needle or hanging water infusion for patients At that time, in 1931, American doctor drbaxbr cooperated with his colleagues to produce the world's first commercial infusion product in the reconstructed old garage, which was widely used in the Second World War for rescue and treatment of many injured people who were dehydrated, bleeding excessively, or had fever and wound infection. For example, the patient's fever will subside immediately within 30 hours of infusion, and western medicine will be applied to the infected wound, especially for bacteria. At that time, the side effects of chronic diseases, viruses and long-term infusion could not be found in a short time.

首先对《新型肺炎病毒病》作起源和防治的问题进行论叙,以利建立起实效全民防疫,将疫情中的经济损失再夺回来。

First of all, the origin and prevention of New Pneumonia Virus Disease are discussed, so as to establish effective nationwide epidemic prevention and recover the economic losses in the epidemic.

Chinese medicine, water infusion, media, prevention and treatment.

据介绍,自2019年12月30日收到武汉市不明原因肺炎样品以来,武汉病毒所一直全力开展2019新型冠状病毒病原鉴定、病毒溯源、病原检测、抗病毒药物及疫苗研制工作。2020年1月2日,研究所获得了2019冠状病毒全基因组的序列。1月5日,该新型肺炎病毒被成功分离,并于1月9日按标准完成国家病毒资源库入库。

It is reported that since receiving the samples of unexplained pneumonia in Wuhan on December 30, 2019, Wuhan Virus Institute has been making every effort to carry out the pathogen identification, virus traceability, pathogen detection, antiviral drugs and vaccine development of 2019 new pneumonia virus. On January 2, 2020, the Institute obtained the sequence of the whole genome of 2019 coronavirus. On January 5, the new pneumonia virus was successfully isolated, and on January 9, the national virus resource library was completed according to the standard.

简称 新型冠状病毒是一类主要引起呼吸道、肠道疾病的病原体。这类病毒颗粒的表面有许多规则排列的突起,整个病毒颗粒就像一顶帝王的皇冠,因此

得名“冠状病毒”。

Neocoronavirus is a kind of pathogen that mainly causes respiratory and intestinal diseases. There are many regularly arranged protrusions on the surface of such virus particles, and the whole virus particle is like a crown of an emperor, so it is named "coronavirus".

为什么全世界发生这次新型肺炎病毒病,和病毒为什么会变异等问题,进一步科学探讨揭开它的面貌。附以下设题解题的椭圆图,也是中国的太极动态场的阴阳图。

Neocoronavirus is a kind of pathogen that mainly causes respiratory and intestinal diseases. There are many regularly arranged protrusions on the surface of such virus particles, and the whole virus particle is like a crown of an emperor, so it is named "coronavirus". Why this new type of pneumonia virus disease occurred in the world, and why the virus will mutate and other issues, further scientific discussion will reveal its face. The following ellipse diagram for problem solving is attached, which is also the Yin and Yang diagram of China's Tai Chi dynamic field.

椭圆运动走势图 [见下图]

本椭圆图首先让人们快捷地了解，如大到星系，星球，小到植物的种子 动物的细胞及各种病菌 病毒等问题，如宇宙仅有弥漫气如何在空中被运动，和被复制出更多能量，及进化出如小病毒等问题。

This ellipse first gives people a quick understanding of such problems as the cells of seed animals as big as galaxies, planets, and plants, as well as various viruses, such as how only the diffuse air in the universe can be moved in the air, and how more energy can be copied, and how small viruses can evolve.

如将椭圆图比做人心脏内的空穴场地上所示，外部热气流进入心脏上部 称磁吸引力面场上的弥漫气，发生扩散从上向下加速中，被复制出更多能量，也是惯性力。由于外侧运动快内侧运动慢。因此作涡旋的气体越过了磁排斥力面场，向重力面场、向心力面场上向上冲击运动。

As shown in the comparison of the ellipse with the cavity field in the human heart, the external hot air flows into the diffuse air on the magnetic attraction surface field at the upper part of the heart, and the diffusion accelerates from top to bottom, which copies more energy and is also an inertial force. Because the outside movement is fast and the inside movement is slow. Therefore, the gas making the vortex crosses the magnetic repulsion force surface field, and impacts upward to the gravity surface field and the centripetal force surface field.

由于气体没有外来的能量作用力补充，反而受到摩擦力、重力等消耗作用力。因此，气体在从下向上仅在惯性力中做减速运动，向中心逐步收缩弯曲作椭圆运动。这种椭圆运动在物理上称向心运动，因此，得到了向心力就加速涡旋。

Since gas is not supplemented by external energy force, it is consumed by friction, gravity and other forces. Therefore, the gas only decelerates in the inertial force from bottom to top, and gradually contracts and bends toward the center to make elliptical movement. This elliptical motion is physically called centripetal motion. Therefore, the vortex is accelerated when the centripetal force is obtained.

好比乒乓球从一米的高度往硬地面下落，每次反弹损失约三十厘米后，但这个高度还是超过了一米高的圆心半径五十厘米。所以，气流以不断缩小涡旋环绕越过中心高度，首先构成了如像宇宙幅射形成的圆环大外圈一样，标志一个质量的诞生。将大外圈表示如不规则细胞外壳的质量形成了。

For example, when a table tennis ball falls from a height of one meter to the hard ground, it loses about thirty centimeters each time it bounces, but the height still exceeds the center radius of a one meter circle by fifty centimeters. Therefore, the air flow passes through the center height with a shrinking vortex, which first forms a large outer circle like a circle formed by cosmic

radiation, marking the birth of a mass. The large outer circle represents the mass of the irregular cell shell.

任何物质聚合后成球壳体上，物质与物质之间都有空穴，因此细胞壁外壳体上都有一个个小空穴，和内部有大空穴。有了空穴，就起到了三种作用，一方面使壳体空穴内外温度和压力不同。如一些慢性病人天天挂水输液，进入身体内水分子被发烧的温度转化成热气流，向细胞内低温偏心空穴场上加速涡旋环绕。被系统惯性力复制成橡皮球一样球状内部的小空穴。而多余的气就被离心力抛出细胞壁上一个个小空穴。由于被皮肤挡住，不像身体内热气流，冲出皮肤上一个个小孔穴外，被涡旋成一根根汗毛或长成一根根管状的长头发。

On the spherical shell formed by the aggregation of any substance, there are holes between the substance and the substance, so there are small holes on the outer shell of the cell wall and large holes inside. Cavities play three roles. On the one hand, the temperature and pressure inside and outside the shell cavity are different. For example, some chronic patients use water every day for infusion, and the water molecules entering the body are converted into hot air flow by the temperature of fever, which speeds up the vortex around the low temperature eccentric hole field in the cells. A spherical interior cavity reproduced by the inertial force of the system as a ball. Excess gas is thrown out of small holes on the cell wall by centrifugal force. Because it is blocked by the skin, it is not like the hot airflow in the body, rushing out of the small holes on the skin and being whirled into hairs or long hair like tubes.

而细胞内冲出小空穴的气流，就在细胞壁一个个小孔穴孔上，涡旋成一个个冠，冠盘上向心涡旋转化出吸力大了，就将皮肤内更多热气流，包括挂水输液进入皮肤内的药物小分子，一同被吸入冠盘中心，就向细胞内低温的偏心空穴场上，加速涡旋环绕复制成球状团，就是又一个小分子。

The air flow from the small holes in the cells swirls into crowns on the small holes in the cell wall. The centripetal vortex on the crown plate transforms into a large suction force, and more hot air flow in the skin, including small drug molecules that are injected with water into the skin, is inhaled into the center of the crown plate together, and then accelerates the vortex to circulate around the eccentric hole field with low temperature in the cells and replicate into a spherical mass, which is another small molecule.

这个偏心空穴场如同杠杆力臂的长短，是将质量复制出更多能量的场，进入场气流 不论好坏多少，连挂水输液药物的小分子，被涡旋成团。由于加速涡旋时转化出温度，将一个个小球状团被转化成蛋白质大空壳——也是病毒。

This eccentric hole field, like the length of the lever arm, is a field that replicates the mass into more energy.

No matter how good or bad the gas flow into the field is, small molecules linked with water infusion drugs are swirled into clusters. As the temperature is transformed when the vortex is accelerated, small globules are transformed into large empty shells of protein, which are also viruses.

可这个病毒质量大小,是取决于如病人挂水输液次数多少,使用药物种类和药物量,及病人身体强弱或地利环境.如在非洲热气候或寒带地区,病人身体内进化出病毒的质量也不同.但它只是寄生在细胞中,只能被细胞偏心空穴场系统复制出更多能量,就是更多小病毒.而且它离开细胞就失去复制的能力.并且它在细胞内,连尸检都没有查找到,如心脏被它传染上病毒.因没有作用力给病毒,它就是死物.

However, the amount of the virus depends on the number of times the patient has hung water for infusion, the type and amount of drugs used, and the patient's physical strength or geographical advantage. For example, in the hot climate or cold zone of Africa, the quality of the virus evolved in the patient's body is also different. But it is only parasitic in cells, and can only be copied more energy by the eccentric hole field system of cells, that is, more small viruses. And it loses its ability to replicate when it leaves the cell. And it is in the cell, even the autopsy did not find, such as the heart was infected with the virus. Since there is no force on the virus, it is dead.

而且由小细胞与小细胞或由小分子与小分子结合成的细胞壁之间的空穴更小.就像茧子上山时一根丝圈绕成的茧果一样,它之间的小空穴非常小.而且,小细胞与小细胞结合成的外壳,受温后就比内壁硬.是不容许外来的冠状等病毒跑进跑出,至少会将病毒上的某一个冠,卡在细胞壁上空穴孔不进出.病毒连自己都活动不了,怎么去传染其它物?

And the holes between the cell walls formed by small cells and small cells or by small molecules and small molecules are smaller. Just like the cocoon fruit formed by a silk coil when the cocoon goes up the mountain, the small holes between them are very small. Moreover, the outer shell formed by small cells and small cells is harder than the inner wall after being heated. It is not allowed for foreign coronal viruses to run in and out. At least one crown of the virus will be stuck in the hole on the cell wall. The virus can't even move itself. How can it infect other things?

您看下面的第一张图,是果子内部周围也有一个个小空穴场,就像椭圆图上有大有小的六个状态空穴场.每一个场的空间也有大中小三种质量,场内被复制出小分子也有多少.而且果子中间也有一个偏心大空穴场。

The first picture below shows that there are also small hole fields around the inside of the fruit, just like there are six state hole fields in the ellipse. The space of

each field also has three kinds of mass, large, medium and small, and how many small molecules are copied in the field. There is also an eccentric large hole field in the middle of the fruit.

当外部的热气流向心涡旋环绕,进入到低温的偏心空穴场上,就被一次次涡旋复制成一个个小分子.必然被系统的离心旋力连续地抛出去,就形成了过程中一条条不同能量离心力的气旋臂.也是根据每一次向心旋力加速涡旋环绕,转化出离心旋力抛出去作用力的大小,对号入座一个个小分子输送到每一个小空穴场上,果子内各个场上所有小分子,就发生核聚变式一天天地快速长大及进化到成熟。

When the external hot air flows around the centripetal vortex and enters the low temperature eccentric hole field, it is copied into small molecules by the vortex again and again. It must be continuously thrown out by the centrifugal force of the system to form cyclonic arms with different energies in the process. It is also based on each centripetal rotation force to accelerate the whirl around, and transform the centrifugal rotation force to throw out the force. Small molecules are transported to each hole field one by one. All small molecules on each field in the fruit will grow up and evolve to maturity day by day in a nuclear fusion way.

以下是真实果子剖开拍照的图。

The following is a picture of the real fruit.

这个是病菌 This is a germ

[本第三图是冠状病毒 可能是武汉病毒研究所,发表头条或看点快报网上,我就下载研究它,你看第一

张果子,和第四张图片是新型肺炎病毒的内部结构,同以上的椭圆图的内部偏心系统结构,实是同一个样子图。因那张椭圆图是我四十年前,发明偏心涡旋发动机时,才发现天机,就画出草图并写进《关于统一场论的综合论述》发表科技咨询导报期刊上和《我对太极图理解和运用》文章中,就是现在文章这个《椭圆图》。四十年后外国专家们才发现,黑洞中心也有一个向心旋力的气旋团,还有一个被离心旋力抛出去稍微大些的气旋团,所以黑洞的弥漫气流,向心涡旋加速环绕就转化出吸力,才有万有引力。牛顿仅是运动产生引力,而物理大师里奇是一点运动和零运动有引力。

[This third picture is probably a coronavirus from Wuhan Virus Research Institute. I will download and study it when I publish the headline or watch the bulletin online. You can see the first fruit and the fourth picture are the internal structure of the new pneumonia virus, which is the same as the internal eccentric system structure of the above ellipse. Because that ellipse is the same as the one I found when I invented the eccentric vortex engine 40 years ago, I drew a sketch and wrote it in In the articles published in the Science and Technology Consulting Guide Journal and My Understanding and Application of Tai Chi Diagram in the Comprehensive Discussion on the Unified Field Theory, the current article is the Ellipse Diagram. Forty years later, foreign experts found that there was also a cyclone cluster with centripetal force in the center of the black hole, and a cyclone cluster with a slightly larger force thrown by the centrifugal force. Therefore, the diffuse air flow of the black hole, surrounded by the centripetal vortex acceleration, was transformed into suction, and there was universal gravitation. Newton just does not move to produce gravity, while Ricky, the physics master, has gravity in a little movement and zero movement.

我的'向心旋'和'离心旋'属于两点或多点互绕运动,如被系统转化出离心旋力,将白细胞抛出心脏,推挤磨擦进化成红血球,在人的身体内运动。若系统离心力小等因素,抛出心脏就生了白血病及男女孩一天天吃下肚的食物转化出气,及被进化成其它元素如蛋白质等。包括生病挂水输液中药物的小分子也存身体内,虽然也使小孩一天天地长大长高和进化成老人了。必然身体内在过程中也有副作用的杂物。如同手机天天上网,就出现垃圾等废品太多,需要手动清理掉那些垃圾。否则不清理就不好上网了一样。

My 'centripetal rotation' and 'centrifugal rotation' belong to the mutual rotation of two or more points. If the centrifugal rotation force is transformed by the system, the white blood cells are thrown out of the heart, pushed and rubbed, and evolved into red blood cells, which move in the human body. If the centrifugal force

of the system is small and other factors, the heart will give birth to leukemia and the food that boys and girls eat every day will be converted into gas, and will be evolved into other elements such as protein. Small molecules, including the drugs in water infusion when sick, are also stored in the body, although they also make children grow taller and older day by day. There must be sundries with side effects in the internal process of the body. Just like the mobile phone surfing the Internet every day, there are too many waste products, such as garbage, which need to be manually cleaned up. Otherwise, it will be hard to get online if you don't clean it up.

如一些细胞内就储存了越来越多的小分子,便进化成质量大的也是医学名词 癌细胞。就像人体内先有细胞,后进化出精子卵子等一样。可癌细胞内储存了更多小分子,它做出涡旋作用力就比细胞大,就将身体内各种小分子,被它的涡旋吸入时转化出的微热,也将一些小分子物进化成如元素或蛋白质之类。可一些人由于各种原因如常生病,如挂水输液中一次次小分子等垃圾多了,癌细胞的速度只能清理身体内大部分垃圾,一部分小分子还存放在身体内,也就随血液循环。

For example, some cells store more and more small molecules, and then evolve into cancer cells with high mass. Just like the human body has cells first, and then it turns into sperm. However, more small molecules are stored in cancer cells Its vortex force is greater than that of cells, so it will convert various small molecules in the body into micro heat when inhaled by its vortex, and also evolve some small molecules into elements or proteins. However, some people get sick as usual due to various reasons. For example, there are too many small molecules and other garbage in the water hanging infusion. However, cancer cells can only clean up most of the garbage in the body, and some small molecules are still stored in the body, which also circulates with the blood.

挂水输液后首先增加了病人身体内湿气重,经络不畅通。一般儿童的血液粘稠度比较低,发病率少。而老年人身体内被几十年来积余了更多小分子,红细胞,白细胞,血小板,水,糖,脂肪,蛋白质,钾盐和钙盐混合物等杂物。进化成老年人血液粘稠度比较高。而且还使老年人气血运动到腿上时,两条腿爬楼都爬不动了。

After hanging water for infusion, the humidity in the patient's body was increased and the meridians were blocked. The blood viscosity of general children is relatively low, and the incidence rate is low The elderly have accumulated more small molecules, red blood cells, white blood cells, platelets, water, sugar, fat, protein, potassium salt and calcium salt mixtures and other impurities in their bodies for decades. It has evolved into that the blood viscosity of the elderly is relatively high,

and it also makes the elderly unable to climb the building when their blood and qi move to their legs.

中医有一句古话: 千寒易去, 一湿难除。吹空调, 吃冰冷食物, 饮食不节, 居住处潮湿等, 都是加重人体内湿气的元凶。如果不能及时排出, 就会隐匿于你的身体中从而造成隐患。如湿气上行, 则会长斑长痘, 油光满面, 湿气下注, 则会引发一系列妇科疾病, 损害身体。湿气在皮, 会引起湿疹等皮肤病, 湿气入骨, 则引发关节炎, 肩周炎等等。湿气在内首先会侵犯脾胃, 然后停留在肾, 继而湿气会侵犯心肺, 同时, 湿气下侵肝, 胆, 膀胱, 五脏六腑, 无一能幸免。

There is an old saying in Chinese medicine: A thousand colds are easy to get rid of, but one dampness is hard to get rid of. Blowing the air conditioner, eating cold food, improper diet, and humid living places are all the culprits of aggravating the humidity in the human body. If it cannot be discharged in time, it will hide in your body and cause hidden danger. If the humidity rises, it will cause spots and pimples. If the humidity drops, it will cause a series of gynecological diseases and damage the body. Moisture in the skin can cause skin diseases such as eczema, while moisture in the bone can cause arthritis, shoulder periarthritis, and so on. The dampness first invades the spleen and stomach, then stays in the kidney, and then it invades the heart and lungs. At the same time, it invades the liver, gallbladder, bladder, and viscera.

因此, 一些质量差细胞, 癌细胞及小分子, 被基因向心力旋臂吸入空穴中心, 被转化出离心力的旋臂抛出去, 复制出更多质量差的细胞。这些细胞上还留下了生病时记忆的密码。若再遇到气候冷或恐怖环境等, 抵抗疾病能力差的细胞等。仅几十分钟就生病甚至病进化更严重。

Therefore, some cells with poor quality, cancer cells and small molecules are sucked into the hole center by the centripetal force spiral arm of the gene, and are thrown out by the centrifugal force spiral arm to reproduce more cells with poor quality. These cells also left the password of the memory of the sick elbow. If encountering cold weather or distribution fear environment again, cells with poor disease resistance ability, etc It takes only a few minutes to get sick and even worse.

病人就到医院检查。医生就按照医学书上说, 生了白血病或癌病, 连基因的旋臂都断断续续, 被病毒破坏了基因链。可能是平时抽烟 喝酒 喝茶, 或者吃了不该吃的水果蔬菜等因素, 就当白血病或癌病治, 进行放化疗是最佳治疗。

The patient goes to the hospital for examination According to the medical book, when leukemia or cancer occurs, even the spiral arm of the gene is intermittent, and the gene chain is destroyed by the virus. It may be that people usually smoke, drink and drink tea,

or eat fruits and vegetables that should not be eaten. When leukemia or cancer is treated, radiotherapy and chemotherapy are the best treatment.

可放化疗的药物必然要为病人挂水输液, 形成的是新分子结构的机体, 以确保活体细胞的生存和恢复的环境。

The drugs that can be used for radiotherapy and chemotherapy must be used for patients to form a new molecular structure of the body to ensure the survival and recovery of living cells.

可人身体内是一个复杂系统工程, 如水多水少, 水温度高低 水流速快慢 及进入身体内和进入胃处理, 更有一定讲究。水可以缓解疼痛, 水又会加重病情。若长期挂水输液, 就至少破坏身体内系统工作。

However, the human body is a complex system engineering, such as more water, less water, high and low water temperature, fast and slow water flow, entering the body and entering the stomach for treatment. Water can relieve pain, and water can aggravate the disease. If you hang water for a long time, you will at least damage the system work in your body.

为什么这次世界性新型冠状病毒病大发作, 如武汉是中国大省, 各行各业都发达繁忙, 特别春节前, 武汉那个病人, 每天很早去水产品冰库装车运货, 身体忙得常流汗, 也没及时去洗澡换衣服。并且, 他们居住地不远处就有一个火葬场, 焚烧尸体的尘埃扩散在空气中, 就被植物 动物及人类呼吸到。或者这些食物也会被病人平时吃到, 包括身体内几十年来积余了, 一些新陈代谢分裂的细胞遗留物, 或体积收缩及凋亡或干瘪 微小尘埃存在身体内, 并没有被大小便排泄掉。再加冬季穿的棉衣棉鞋重, 每天早上起得早, 身体受严重寒凉和劳累流汗在衣服上, 就发烧引起肺部不适。

Why is the worldwide outbreak of new pneumonia coronavirus disease? For example, Wuhan is a big province in China, and all walks of life are developed and busy. Especially before the Spring Festival, the patient in Wuhan went to the aquatic product ice store to load and transport goods very early every day. His body was so busy that he often sweated, and he did not go to bathe and change clothes in time. In addition, there is a crematorium not far from their residence. The dust from burning corpses diffuses in the air and is breathed by plants, animals and humans. Or these foods will also be eaten by patients at ordinary times, including those accumulated in the body for decades. Some cell remnants of metabolic division, or shrinkage and apoptosis or shrunken tiny dust exist in the body, and are not excreted by urine and urine. In addition, the cotton padded clothes and shoes worn in winter are heavy. Every morning, when the body gets up early and sweats on the clothes due to severe cold and fatigue, the fever will cause lung discomfort.

所以, 新型冠状病毒若是传染病, 去年刚开始不会隔空传染给上万公里外的新西兰国家, 应该首先武汉很多人被传染上病。及是传染病, 也要有大量的各种动物发病率和死亡率来证明。因动物生活环境更恶劣, 也没有医生给它们治病。

Therefore, if the new pneumonia coronavirus is an infectious virus, it will not be transmitted to New Zealand countries tens of thousands of kilometers away just last year. Many people in Wuhan should be infected first. It is also an infectious disease, which should be proved by a large number of incidence rate and mortality rates of various animals. Because the living environment of animals is worse, there is no doctor to treat them.

而且靠中国最近的朝鲜人民 至今没有新冠病毒肺炎病毒发病率。也可能他们是不信者则无。他们的媒体很少报导有关疫情恐怖事件的新闻, 人民群众就少意念到这方面的事。及是生病了, 医生也不可能先当病毒用药挂水输液, 病人身体内就进化不出新型肺炎病毒。

Moreover, the Korean people closest to China have no incidence rate of COVID-19 virus so far. Or maybe they are not believers. Their media rarely reported the news about the epidemic and terrorist events, and the people were less aware of this. And when the patient is sick, it is impossible for the doctor to be the first to use the virus medicine and use water for infusion, so that the patient's body will not evolve a new type of pneumonia virus.

另武汉去年二月初有一家六口人, 大人个个生病发烧住院, 可一个十岁的小孩确没有发烧生病。是不符合传染病的性质。用反证法证明: 假设专家是正确的, 那么疫区一年多时间, 至少大多数人都被传染! 事实是绝大多数人没被传染! 而且全世界从去年到今年, 所报导出来的新型冠状病毒肺炎, 并没有任何一个国家是天天涨发病率 所以不是传染病, 那就不需要如封城封小区等严防疫的措施, 人民就安居乐业 少经济损失等问题的发生。

In addition, at the beginning of February last year, there was a family of six in Wuhan. All the adults were ill and hospitalized with fever, but a 10-year-old child did not get sick with fever. It does not conform to the nature of infectious diseases. To prove with the method of contradiction: assuming that the experts are correct, at least most people have been infected in the epidemic area for more than a year! The fact is that most people are not infected! Moreover, from last year to this year, no country in the world reported that the incidence of COVID-19 was rising every day, so it was not an infectious disease. So there was no need for strict epidemic prevention measures such as closing cities and communities, and people would live in comfort and enjoy less economic losses.

这次世界性疫情发病率多, 时间长等事的原因, 至

少由五个方面原因。一 如地球还围绕自转极 25800 年周期中, 已经转了约 14000 多年, 大夏天的热气候刚结束, 惯性力使地球进入到不规则速从下向上做降速。如北极的冰川被大夏天的高温不断地融化, 这些冲上天空冷空气中, 也夹杂着夏季从赤道刮过去的尘埃和病菌等, 就向赤道方向加速运动时, 就同自然界人类的活动如各地区的各种机车、飞机、特别军舰在大洋大海中横冲直撞, 转化出强热气流冲向天空, 就加大了秋冬季大气环流运动, 使某些地区气候如干燥或寒冷的时间延长了, 还演化出各种自然灾害。并且现在各国家使用如空调等现代化产品多了, 因此更加大冬季和夏季比秋季发病率多。

There are at least five reasons for the high incidence rate and long duration of the world epidemic. Just as the earth has been rotating around the rotating pole for more than 14000 years in a 25800 year cycle, the hot weather in summer has just ended, and the inertial force makes the earth enter an irregular speed and slow down from bottom to top. For example, the glaciers in the Arctic are continuously melted by the high temperature in summer, and the cold air rushing into the sky is also mixed with the dust and germs scraped from Yidao in summer. When they accelerate towards the equator, they collide with natural human activities, such as various locomotives, aircraft and special warships in various regions in the ocean and sea, transforming into strong hot air and rushing into the sky, which increases the atmospheric circulation movement in autumn and winter. The climate in some areas, such as dry or cold, has been prolonged, and various natural disasters have evolved. And now countries use more modern products such as air conditioners, so the incidence rate in winter and summer is more than that in autumn.

另气候的变化也包括社会发展的变化在内。如世界进入冷战时期, 各国家生产力又大发展, 人民生活水平不断地提高, 也就各国家领导人和人民都增强了自信, 就进化出各种各样的事, 就又形成新的气力冲上天空。如当初 2011 年美国支持反政府组织, 而俄罗斯确支持现政府, 使得那场战争长期的三方交战, 导致了叙利亚大批基础设施, 民居建筑被破坏, 到 2018 年 9 月 6 日至计算, 光是叙利亚一国, 在战争中的损失就高达 3000 亿美金! 而有的观察组织认为 7 年中, 至少有 40 万人在叙利亚战争中死亡, 大批老百姓只能流离失所, 偷渡前往欧洲等国成为难民。可一些国家和人民 如美国对流离失所难民, 美国政府只顾本国利益建起围墙, 挡住难民潮进入美国。并且其它国家也用不同方法对待难民, 如驱赶难民等。是多么伤德的事。

In addition, climate change also includes changes in social development. If the world enters the cold war period, the productivity of all countries has been greatly

developed, and the living standard of the people has been constantly improved, then the leaders and people of all countries have become more confident, and a variety of things have evolved, and new strength has been formed into the sky. For example, in 2011, the United States supported anti-government organizations, while Russia did support the current government, which led to a long-term tripartite war in that war, leading to the destruction of a large number of infrastructure and residential buildings in Syria. By September 6, 2018, Syria alone will have lost as much as 300 billion dollars in the war! Some observation organizations believe that in the past seven years, at least 400000 people died in the Syrian war, and a large number of people can only be displaced and smuggled to Europe and other countries to become refugees. However, some countries and people, such as the United States, have built walls for displaced refugees, and the United States government only cares about its own interests to block the flow of refugees into the United States. And other countries also treat refugees in different ways, such as expelling refugees. It's such a wicked thing.

国与国之间人与人之间矛盾激化,难民们怨声载道气流不断地冲向了天空。正如法兰西帝国拿破仑所言“就是武力的无能,最终武力总是被思想所征服。”天将人类狂妄自大永无止境的贪婪气流冲上天空高压区,被天将高压区气向地面低压区加速涡旋环绕,复制出的作用力像龙卷风那样雷霆万钧之力,再返还给全世界各国家以示警告。

The contradictions between people between countries are intensifying, and the refugees are complaining and the air flow is constantly rushing into the sky. As Napoleon of the French Empire said, "It is the impotence of force, and ultimately force is always conquered by thought." The sky rushed the insatiable greedy air current of human arrogance into the sky high pressure area, and was surrounded by the accelerating vortex of the sky high pressure area air to the ground low pressure area. The duplicated force was like a tornado It will be returned to countries all over the world as a warning.

因此,形成了各地区气候的冷热变化,使全世界各国家发病率和死亡率也就各不相同。这是第一个发病率多少的溯源问题。

Therefore, the cold and hot climate changes in various regions have formed, which makes the incidence rate and mortality rates of countries around the world different. This is the first question about the traceability of incidence rate.

第二,这次新冠肺炎病毒病,属于什么类型的病?如是中医定为瘟疫?还是西医定季节性感冒或病毒?还是传染性病毒?没有真正地以事例来证明,如全世界各地已经发生大量动物发病率和死亡率。也使各国家人民群众,特别是近亲都被传染上和死亡率

增多.才能定为传染性的病毒。确采取各种过激防疫措施,如封城封路.也是误诊引出发病率多的第二个溯源问题。

Second, what kind of disease is COVID-19 virus disease? If the Chinese medicine determines the disease as plague? Or does Western medicine prescribe seasonal colds or viruses? Or an infectious virus? There is no real case to prove that, for example, a large number of animal incidence rate and mortality have occurred around the world. It also makes people in all countries, especially close relatives, infected and the death rate increases, so that they can be classified as infectious viruses. It is also the second traceability problem that misdiagnosis leads to a high incidence rate to take all kinds of extreme epidemic prevention measures, such as closing cities and roads.

第三 西医为病人注射药水针或挂水输液治病.在当时 1931 年美国医生 drbaxbr 与同伴合作在改造后的旧车库内,生产出世界上第一瓶商业用输液产品,在第二次世界大战中被大量应用于很多伤员脱水,伤员流血过多,或发烧及伤口被细菌感染进行抢救治疗。如注射药水针 挂水输液药物三十小时内使病人立即退烧,感染伤口西药上去,特别对病菌立即见好效果等。在短时间内,也发现不了挂水输液,对慢性病及对病毒长期输液使用后的副作用问题。

The Third Western Medicine injects liquid medicine needle or uses water to cure patients At that time, in 1931, American doctor drbaxbr cooperated with his colleagues to produce the world's first commercial infusion product in the reconstructed old garage, which was widely used in the Second World War for many patients with dehydration, excessive bleeding, fever and bacterial infection. For example, the injection liquid needle can immediately reduce the fever of the patient within 30 hours of hanging the water and infusion drugs, and the western medicine can be applied to the infected wound, especially for bacteria. In a short period of time, we can not find the side effects of hanging water infusion on chronic diseases and viruses after long-term infusion.

因不是传染病的病菌,必须要喝热中药汤水,或多喝热水口服西药片,经过胃处理无用的随大小便排泄掉。当热药汤水气流再进入低温细胞壁中,用计量来分析,病人喝的热中药汤水,一是药灌满肠,首先为病人补充了大量的热气的水 二是中药经过高温煮溶化在热药汤水中,进入胃及各器官更能被吸收和转化。三经过胃处理后能科学地分配给需要的器官使用。四 对发烧的病人得到更多热量和药性,加快驱除身体内湿气。

Because it is not a pathogen of infectious disease, you must drink hot Chinese medicine soup, or drink more hot water to take western medicine tablets, and those useless after stomach treatment will be excreted with the stool. When the hot medicine soup flows into

the low temperature cell wall again, the hot medicine soup that the patient drinks is divided by the measurement. First, the medicine fills the intestines, and first, a large amount of hot water is added to the patient. Second, the Chinese medicine is boiled and dissolved in the hot medicine soup through high temperature, and can be absorbed and transformed more when it enters the bladder and various organs 3. After stomach treatment, it can be scientifically allocated to the organs needed for use. Four pairs of feverish patients get more heat and drug properties, and speed up the removal of moisture from the body.

另一方面热药汤水进入细胞内,被温度转化成更多气,有了气作用力,它是无孔不入。如一碗热中药汤,一般超过疫苗水三十倍重,而且是热气水。就像气功大师暴发出更大作用力一样,就是热药汤热气使细胞膨胀大,就一个推挤另一个细胞,就将身体内几百亿个细胞都膨胀大,细胞与细胞之间空穴更小,病人就增加力气 加快病好了。而且外来的有害物,如病毒等更不易进入细胞之间,所以中药的热药汤水,就比挂水输液冷水和疫苗冷水作用大许多,而且没有副作用。

On the other hand, the hot medicine soup enters the cell and is transformed into more qi by the temperature. With the force of qi, it is all pervasive. Such as a bowl of hot Chinese medicine soup, it is generally 30 times heavier than the vaccine water, and it is hot gas water. Just like the Qigong Master's outburst of greater force, it is the hot medicine soup and hot gas that make the cells expand. One pushes another cell, which expands tens of billions of cells in the body. The holes between cells are smaller, and the patient increases his strength to speed up his recovery. In addition, foreign harmful substances, such as viruses, are more difficult to enter the cells, so the hot medicine soup of traditional Chinese medicine has much greater effect than the cold water infusion with hanging water and the cold water infusion with vaccine, and has no side effects.

若经病毒专家人工发明出病菌或病毒,是有一定政治目的,制造出的病毒就是活体,才能去传染给动物和人。

If virus experts artificially invent germs or viruses, it has a certain political purpose. The virus produced is a living body, which can be transmitted to animals and people.

可武汉实验室技术水平,还达不到逝者尸体内那种病毒。因此 病毒就不是武汉实验室制造出来的问题。

However, the technical level of Wuhan laboratory cannot reach the virus in the dead body Therefore, the virus is not a problem created by Wuhan laboratory.

为什么美国发病率特别死亡率年年增长,比二百年前翻了几倍,就知道今天不是伤口被细菌感染的

急性传染病。美国长期以来为病人使用如挂水输液,和注射了各种疫苗在人们身体内,长期后就造成副作用后果严重的问题。

Why does the incidence rate and mortality rate of the United States increase year by year, which is several times more than that of two hundred years ago? It is clear that today is not an acute infectious disease in which wounds are infected with bacteria For a long time, the United States has used various kinds of vaccines in people's bodies, such as hanging water for infusion, which will cause serious side effects after a long time.

可他们还将西医技术特别挂水输液等,约一百年前推广到了全世界各国家的医院,也没有详细注明挂水输液,注意那些事项。由于各国家的医院,不懂这方面具体新知识,只看到了西药治病菌感染的病,效果特别好,一些病好得快。而且使用方便,更为医院创收盈利。医生就遵照西医老祖师们的教导方法,去为病人挂水输液治病,也生出一些新的病种,而且死亡率高。确老祖师专家们推导出各种新的病,可能如抽烟致肺癌,喝酒生肝癌;环境污染等问题,就又发明出先进医疗设备来检查病和治病。各国家人寿保险公司,也乐意做这个大生意。

However, they also introduced Western medicine technology to hospitals around the world about a hundred years ago, especially water infusion, and did not specify what to pay attention to. Because hospitals in various countries do not know the specific new knowledge in this field, they only see that western medicine is particularly effective in treating bacterial infections. Some diseases get better quickly Moreover, it is convenient to use and more profitable for the hospital The doctors followed the teaching methods of the Western medicine ancestors to cure the patients with water infusion, which also gave birth to some new diseases with high mortality. It is true that the ancestors and experts deduced that various new diseases were born, such as lung cancer caused by smoking and liver cancer caused by drinking; Environmental pollution and other problems have led to the invention of advanced medical equipment to check and treat diseases. National life insurance companies are also willing to do this big business.

也就被滥用造成了今天,全世界发病率越来越多。如 2021 年比 2020 年的疫情更严重,甚至比历史上任何一次疫情发病率更严重,范围更广大。也就害苦了全世界生出各种病的人,甚至人去财空有苦无处可诉。还使全世界烟 酒 茶叶厂及菜农果农等劳苦大众,致少几万人失去工作及没经济收入养活自己,国家财政也少收入等问题是发明挂水输液的专家无意还是有意,就不清楚其战略目的。

It has also been abused, resulting in an increasing incidence rate worldwide. For example, the epidemic situation in 2021 is more serious than that in 2020, and

even more serious and extensive than the incidence rate of any epidemic in history. It also harms people all over the world who suffer from various diseases, and even people have no place to complain when they go to Caikong. It also makes the world's tobacco, wine, tea plants, vegetable farmers, fruit farmers and other laborious people, causing tens of thousands of people to lose their jobs and have no economic income to support themselves, and the national finance also has little income. It is not clear whether the experts who invented hanging water infusion have no intention or intention to do so.

同时 美国利用没有实际治病作用, 进行核酸大普查发病率, 这个做法看上去科学. 实际上疏忽了每年十万人以上, 每到冬季或夏季会有七八个发病率. 而且, 核酸检查后或多或少感冒发烧的病人, 定为无症状或是阳性病人。

At the same time, the United States conducted a large nucleic acid census of incidence rate, which seemed scientific. In fact, more than 100000 people are neglected every year. Every winter or summer, there will be seven or eight incidence rate. Moreover, patients with more or less colds and fever after nucleic acid examination are classified as asymptomatic or positive patients.

为什么专家们做完核酸检测后应该属什么病, 就是什么病. 不能用擦边球的阳性忽悠病人. 您们应直接说明, 核酸检测后没有发现人传人传染病发病率的病人. 这个核酸检测就能做, 也是做对了。

Why should experts have any disease after nucleic acid testing. Do not fool the patient with the positive side brush ball. You should directly state that there are no patients with incidence rate of human to human infectious diseases found after nucleic acid testing. This nucleic acid test can be done, and it is also done correctly.

干部更不需要做封小区封路各项严防措施. 各行各业忙苦钱, 就发财精神爽, 一正压百邪, 不存在中国有传染病的疫情. 干部和人民群众, 还感谢核酸检测后, 为我们防疫工作做出最好的评估! 今后每到冬季和夏季发病率高高峰期, 做一次核酸检测有没有传染病就有必要!

Cadres do not need to take strict precautions to close the roads in the community. If people in all walks of life are busy with money, they will feel refreshed when they get rich. One good thing can defeat all evil things. There is no epidemic of infectious diseases in China. Cadres and the people are also grateful for the best evaluation of our epidemic prevention work after nucleic acid testing! In the future, it is necessary to do a nucleic acid test for infectious diseases every winter and summer when the incidence rate is at its peak!

另我天天上网也敏感地发现许多新问题. 如当武汉报导新型冠状病毒病, 已经到发病率清零时, 确头条等网上就出现 如英国学者研究论文中说, 现

在病毒在英国医院的病人身体内, 已经进化成新病毒, 好药物如抗生素都杀不死病毒 而且还传染性强等新闻忽悠人。

In addition, I also found many new problems sensitively on the Internet every day. For example, when Wuhan reported the new type of pneumonia coronavirus disease, and the incidence rate had been cleared, headlines and other websites appeared. As British scholars said in their research papers, the virus has now evolved into a new virus in the body of patients in British hospitals, and good drugs such as antibiotics can not kill the virus but also have strong infectivity.

我后来又发现网上说非洲发生数亿个蝗虫, 农作物将大量减产. 我估计会加大宣传蝗灾 甚至蝗虫会飞到中国. 因此我天天注意这信息. 果然网上说非洲数亿个蝗虫, 飞到印度和中国, 中国的秋季农作物将被蝗虫吃掉, 粮食将大减产等问题。

Later, I found that the Internet said that hundreds of millions of locusts had occurred in Africa, and the crops would be greatly reduced. I think we will increase the publicity of locust plague and even locusts will fly to China. So I pay attention to this information every day. Indeed, it is said on the Internet that hundreds of millions of locusts in Africa will fly to India and China, and the autumn crops in China will be eaten by locusts, and the grain yield will be greatly reduced.

及我又在网上发现非洲人, 生了一种更利害传染性病毒病, 死亡率百分之百. 而且还传染给动物, 我看见视频上可能是猩猩双手不停拍打头. 因我曾经患上各种不易治得好的病. 如脑癌痛, 为各种病早日治好, 到处求医, 就知猩猩这种病, 可能吃没‘过江’走阴差大仙也是巫师的药, 吃了下去立即酸碱失去平衡, 如头脑更加重痛及发疯了, 甚至会死亡. 也是任何医生无法治好病. [可能‘过江’就是她们师傅才有解药, 需要病人用到一定钱和病的痛苦到一定时, 经一个个小大仙推荐到, 如张天师或韦陀等专门抓鬼妖的大仙头头手上. 才拿出解药治好病. 但猩猩包括这种病的人, 不会知道吃了什么毒药就死亡. 但不是传染病]

And I found on the Internet that Africans had a more infectious viral disease with a mortality rate of 100%. And it also infects animals. I saw that the video might show the chimpanzee's hands beating his head endlessly. Because I have suffered from various diseases that are difficult to cure. Such as brain cancer pain, which can be cured as soon as possible for all kinds of diseases, and medical treatment has been sought everywhere. It is known that the disease of orangutans may also be the medicine of witches if they haven't crossed the river. After taking it, the acid-base will lose its balance immediately, such as more severe brain pain, madness, and even death. No doctor can cure the disease. [Maybe it was their master who had the antidote for crossing the river. When the patient needed a certain amount of

money and the pain of the disease reached a certain point, they were recommended by one of the little immortals, such as Tianshi Zhang or Weituo, who specialized in catching ghosts and monsters. Then they took out the antidote to cure the disease. But the orangutans, including people with this disease, did not know what poison they would die of. But it was not an infectious disease.]

可中国网上不加思考问题的复杂性,就立即转发各网上宣传,就又中计增加恐怖感引起发病率。而且到了冬季和夏季本来就是发病率又增加的高峰期,总会一个省几千万人口中.有几十个人不小心身体,如受了寒凉或吃冷食太多,或吹空调时间长了及精神压力大等因素,发病率和死亡率也会增多,.可不是传染病,确经媒体过度报导出来是新冠肺炎发病率,就像网络上公布某地发生凶杀案,在一个月全国刑事案件增多一样的后果。另现在科学技术更发达,人工也能制造出病毒。

However, without thinking about the complexity of the problem on the Chinese Internet, they immediately forwarded the online propaganda, and then took the bait to increase the incidence rate caused by the sense of terror. In addition, in winter and summer, when the incidence rate has increased again, there will always be tens of millions of people in a province There are dozens of people who are careless about their health, such as being cold or eating too much cold food, or blowing the air conditioner for a long time and having great mental pressure, the incidence rate and mortality will also increase It is not an infectious disease. It is indeed the incidence rate of COVID-19 that has been over reported by the media. It is just like the result that the murder case in a certain place has been announced on the Internet, and the number of criminal cases nationwide has increased within a month. In addition, science and technology are more developed, and people can also create viruses.

而且自然界每一年有几十万新物种及病毒产生出来,也有几万个老物种及老病毒自然淘汰死亡等进化的事。

In addition, hundreds of thousands of new species and viruses are produced in nature every year, and tens of thousands of old species and viruses are naturally eliminated and died.

可医学专家们又误以为是传染病毒,立即攻关发明出不是口服药或吸入式防疫药,是注射的防疫疫苗,可最好的美国疫苗仅百分之九十五有效率 可往年冬季每约十万人以上,才有几个发病率。

However, medical experts mistakenly thought it was a transmissible virus, and immediately made a breakthrough to find out that it was not an oral or inhaled anti epidemic drug, but an injected anti epidemic vaccine. However, the best American vaccine was only 95% effective. In the past winter, there were only a few

incidence rate for every 100000 people or more.

那问题来了,就是万个人中现在多二三十个发病率,若是十万个人中进行计算,就发病率至少多百个以上.而且原来身体很好的人,也有发病率了。

The problem is that there are now twenty or thirty more incidence rate among ten thousand people. If we calculate the incidence rate among one hundred thousand people, there will be at least one hundred more. Moreover, people who used to be in good health also have incidence rate.

疫苗特制药注射入人们身体内,专家术语蕊片功能.可人身体是一个独立复杂系统,是不允许你疫苗所建立如同新的基因系统,会干扰免疫力。二心脏的涡旋吸力大,就将疫苗药物小分子吸入心脏壁上,由若干个小细胞结合成心脏壁一个个小空穴中,药性强,刺激了心脏壁一个个小孔穴孔,长期易生心脏病。而且肺也会吸入。另疫苗药在身体内随血液循环,可血管壁上孔穴更小,,可一次次疫苗,挂水输液的药物小分子等随血液循环,长期多消耗血液循环作用力,也易引起血栓等病。所以今天美国发病率是二百年前几倍的原因。

Vaccine injection into people's bodies, experts term core function But the human body is an independent and complex system, which does not allow you to build a vaccine like a new gene system, which will interfere with immunity. Second, the vortex suction of the heart is large, so small molecules of vaccine drugs are inhaled into the heart wall, and several small cells are combined into small holes in the heart wall. With strong drug properties, the small holes in the heart wall are stimulated, which is prone to heart disease for a long time. And the lungs inhale. In addition, the vaccine drug circulates with the blood in the body, and the hole on the blood vessel wall is smaller. The vaccine can be used once and again, and the small molecules of drugs that are used for infusion with water consume more blood circulation force for a long time, which is also easy to cause thrombosis and other diseases. So today's incidence rate in the United States is several times that of 200 years ago.

因发明出疫苗前,如将以前病毒经高温烘焙干,和粉碎成个体,使它永不被复制。这些更小的死物个体,经注射入身体内。若停留在身体内某处死物个体多了,意味这位置如被心脏涡旋吸入心脏壁上小孔穴,长期易生病。因粉碎后虽然不能被复制,但它还能释放出药性、专家说增强免疫力。实这些个体就像炒熟的种子,去下种一样使这些个体被激活不了。长期有副作用。

Before the vaccine was invented, if the previous virus was baked dry at high temperature and crushed into an individual, it would never be duplicated. These smaller dead bodies are injected into the body. If there are many dead objects staying in a certain place of the

body, it means that this place is easy to get sick for a long time if it is inhaled into a small hole on the heart wall by the heart vortex. Although it can not be duplicated after being crushed, it can also release drug properties. Experts say it can enhance immunity. In fact, these individuals are like fried seeds, which can not be activated by seeding. Long term side effects.

而且粉碎后更小个体,就容易进入细胞壁上小孔穴孔了,和进入更细的经络及血管中。就像轴承珠槽内有了灰尘,轴承不便转动一样。这次上海八十岁以上没注射疫苗死亡占注射疫苗死亡的百分之九十。若按年令注射过疫苗死亡的岁数是40多岁和六十多岁之间,提前死亡是做疫苗药的理論出问题。

Moreover, smaller individuals after powder extraction can easily enter the small holes on the cell wall and into the finer meridians and blood vessels. As there is dust in the bearing groove, the bearing is inconvenient to rotate. This time, 90% of the deaths in Shanghai were caused by vaccination without vaccination. If the number of people who have been vaccinated dies annually is between 40 and 60 years old, premature death is a problem in the theory of making vaccine drugs.

这个或是发病率多溯源的第四个问题。否则,现在不总结经验,今后每过十多年,如太阳黑子少的时候,还会发生一次大疫情,还会将疫情责任推给中国背黑锅一样。

This may be the fourth problem of multiple traceability of incidence rate. Otherwise, if we do not summarize our experience now, there will be a major epidemic every ten years in the future, such as when there are few sunspots, and we will also blame China for the epidemic.

从中医角度来说 逢药都有三分毒,若不是传染病,仅是流行病,至多将疫苗药做成口服药或雾化吸入式的防疫药.或做成膏药超前如贴肚脐眼,或超前口服防疫药。副作用小就可不注射疫苗了.这件重大事,需要专家们进一步技术鉴定今后做不做防疫药为准。

From the perspective of traditional Chinese medicine, every medicine has three kinds of viruses. If it is not an infectious disease, it is only an epidemic disease. At most, the vaccine should be made into oral medicine or aerosol inhalation anti epidemic medicine Or it can be made into a plaster in advance, such as sticking to the navel, or oral anti epidemic drugs in advance. If the side effects are small, the vaccine will not be injected. This important event requires further technical supervision by experts to determine whether to do anti epidemic drugs in the future.

并且医学理論上没有这方面详细介绍,和对掛水輸液的水有那些严格要求,医学仪器上也无法看见气如何在身体内运动,及水进入身体内微观运动上的问题。所以,医生这能按照医学理論去用药治病。否

则谁也担当不起医疗事故的责任。

In addition, there is no detailed introduction to this aspect in medical theory, and there are strict requirements on the water for hanging water infusion. Medical instruments can not see how the qi moves in the body, and the micro movement of water into the body. Therefore, doctors can treat diseases according to medical theories. Otherwise, no one can bear the responsibility of medical accidents.

如武汉上千个医生,长时间穿着重防传染的防护服,精神压力也大,还日夜忙着为病人治新冠肺炎病,累得自己都生病,是用同样的药物治疗,也先后有若干个医生逝世。所以说任何医生都希望尽快治好病人,不存在是医生的责任,是医学理論方法上不完善出的问题。

For example, there are thousands of doctors in Wuhan who wear protective clothing against infection for a long time. They are also under great mental pressure. They are also busy treating patients with COVID-19 day and night. They are tired and sick. They are treated with the same medicine, and several doctors have died successively. Therefore, any doctor hopes to cure the patient as soon as possible. It is the responsibility of the doctor not to exist, and it is the problem of imperfect medical theories and methods.

因有些放化疗挂水輸液中如葡萄糖之类药物,輸送给病人身体内吸收,病人立即精神好多。

Because some drugs, such as glucose, were delivered to the patient for absorption in the body during radiotherapy and chemotherapy with water infusion, the patient became much more energetic immediately.

医学教科书上应对病毒对慢性病的病人,可根据病情挂水輸液三天后若有效果,也要先吃中药或口服西药,每隔约停4天左右,才再只挂三天水为一个疗程,而且挂水的速度也不能太快,就是吊瓶不能挂得太高,挂水量正常病人,一天只能挂一并水,最好挂水輸液的设备要保持同病人身体温度一样高的水温,甚至高一两度,退烧效果会更好。

In the medical textbook, the patients with chronic diseases can be treated by hanging water for infusion for three days according to their condition. If it is effective, they should also take Chinese medicine or take western medicine orally. Every four days or so, they can only hang water for three days as a course of treatment, and the speed of hanging water should not be too fast. That is, the hanging bottle should not be hung too high. For patients with normal hanging water volume, only one water can be hung for one day. It is best to keep the water temperature of the equipment for hanging water for infusion as high as the patient's body temperature, Even one or two degrees higher, the fever will be better.

可以通过计量计算,假定某个人体重130斤,病人身体内额外累计接收的水是不能超过体重.如若病人

平均每天挂水输液约一斤，连续挂水输液一个月就是三十斤。若连续挂水输液五个月就是 150 斤水，这些水中潮湿药物的小分子，可能共有两三斤。越积越多不是存放在胃中，不能被处理后随大小便被排泄掉。而是水中潮湿药物的小分子存在病人身体内。

It can be calculated by metering, assuming that a person weighs 130 kg, the additional water received in the patient's body can not exceed the weight. If the average patient receives about one kg of water every day, the continuous infusion with water for one month is 30 kg. If the continuous infusion with water for five months is 150 jin of water, the small molecules of damp drugs in the water may be two or three jin in total. The more the product is, the more it is not stored in the stomach, and it cannot be processed and excreted with urine and stool. However, small molecules of damp drugs in water are stored in the patient's body.

如一些动物,冬季下雨雪时突然发生激烈战斗或长途奔跑后,身体流出很多汗也困了,就躺着休息或睡觉,动物身体内受冷热就发烧,也进化出新的病毒一样,但病毒不一定会致动物死亡。因动物生病没医生为它治病.它睡觉几天,就使身体内运动结构和能量结构得到了调整,就增强免疫抗体力,病也好了。

For example, some animals, when it rains and snows in winter, suddenly have a fierce fight or a long distance run, and their bodies sweat a lot and become sleepy, so they lie down to rest or sleep. When they get cold and hot, they have a fever, which is the same as the evolution of new viruses. However, viruses may not necessarily cause animals to die. No doctor can cure an animal because it is ill After sleeping for a few days, it can adjust the movement structure and energy structure in the body, strengthen the immune antibody and improve the disease.

所以注意适度为病人挂水输液,就可避免或减少病人身体内的细胞,吸收不了多余的水涡旋流向心脏,药物中的小分子的药性就刺激不了心脏壁上一个个小空穴,少生心脏。另为病人挂水输液的水进入肺速度慢,药物中的小分子就涡旋积存在肺膜外形成了水肿块,就挡住水往肺上的小孔穴里流。而病人肺里的水,被发烧的温度转化成痰,病人就咳嗽和呼吸困难等问题。若使用助氧机,甚至会加重病情。

Therefore, we should pay attention to properly hanging water for infusion, which can avoid or reduce the cells in the patient's body, and can not absorb the excess water whirl to the heart, and the drug properties of small molecules in the drug can not stimulate the small holes on the heart wall, so as to reduce the birth of the heart. In addition, the water for the patient to hang water for infusion enters the lung slowly, and the small molecules in the drug will vortex and accumulate outside the lung membrane to form a water mass, which blocks the water from flowing into the small holes on

the lung. The water in the patient's lungs is converted into sputum by the temperature of fever, and the patient has cough, dyspnea and other problems. If you use an oxygen machine, it will even aggravate the disease.

若是重病人,这时最好的医生是自己,不同意再挂水输液,服中医配的药,剩热喝中药汤,或吃西医开的药片时,多喝热水服药,甚至冬季头上戴帽子,脚上穿袜子,少用空调,睡进热被窝认真天天休养或睡觉,每天吃药后中间时间,也可喝多放红茶叶泡的热茶水,或少食多次喝热的豆粥,因豆粥继当茶又当饭,而且更容易吸收营养,包括喝热茶或喝热豆粥,促使系统活跃起来转化出热气多。胸腔内未吸收完的液水,几天后逐步没有了,和血管内凝聚的血液,又开始溶解血栓了.血液就又正常循环 重病一天比一天逐步好。重病时千万不能再挂水输液。以防后果。

If the patient is seriously ill, the best doctor is himself. He does not agree to hang up water for infusion, take medicine prepared by traditional Chinese medicine, drink traditional Chinese medicine soup when it is still hot, or take medicine with more hot water when taking pills prescribed by western medicine. Even in winter, wear a hat on his head, wear socks on his feet, use less air conditioning, sleep in a hot bed, and seriously recuperate or sleep every day. In the middle of every day after taking medicine, he can also drink more hot tea water soaked with black tea leaves, or eat less hot bean porridge, because bean porridge is used as both tea and rice. Moreover, it is easier to absorb nutrients, including drinking hot tea or hot bean porridge, to make the system active and transform more heat. After a few days, the fluid in the chest cavity that had not been absorbed gradually disappeared, and the blood condensed in the blood vessels began to dissolve the thrombus again The blood circulates normally and the serious disease gets better day by day. Never use water for infusion when you are seriously ill. In case of consequences.

为什么重病人喝热中药汤,还要头上戴帽子脚上穿袜子。因病人长期挂水输液,使病人身体内湿气加重了,虽然热中药汤药灌满肠,立即使病人身体内湿气下降,热水气进入细胞就膨胀大,就一个细胞推挤另一个细胞,将几百亿个小细胞都膨胀大,细胞与细胞之间间穴更小,病人就有精神力气,加快病好。可病人每天这喝两杯热药汤,它驱除身体内湿气少,若病人头上戴帽子脚上穿袜子,首先使病人身体内热气流不从头和脚上跑出去,病人睡在热被窝里,就将身体内湿气驱除更多了,甚至病人一觉醒就感觉病好多。当然服伺病人的人,要认真观察,一方面夏季不要盖两床被,节是冬季也要掌握病人体质及耐受能力。所以,不是病毒的问题。

Why do heavy patients drink hot Chinese herbal soup and wear hats and socks on their heads and feet. Because the patient has been drinking water for a long time, the moisture in the patient's body has been

aggravated. Although the hot Chinese medicine soup filled the intestines, the moisture in the patient's body immediately drops, and the hot water gas expands when it enters the cells. One cell pushes another cell, and expands tens of billions of small cells. The point between the cells is smaller, and the patient has mental strength to speed up his recovery. But the patient drinks two cups of hot medicine soup every day, which can expel less moisture from the body. If the patient wears a hat on his head and socks on his feet, first of all, the hot airflow in the patient's body will not run out from his head and feet. When the patient sleeps in the hot quilt, he will expel more moisture from the body, and even feel much sick when he wakes up. Of course, those who serve the patients should observe carefully. On the one hand, do not cover two beds in summer, but also master the patient's body texture and tolerance in winter. Therefore, it is not a problem of viruses.

若全世界各医院注意长期挂水输液使用的方法,可以预言,全世界又回到二百年前病人的,人均死亡率比例水平,而且各种病的发病率也减少。同时也解决了医学上和政治上互相纠缠的一个大问题。否则,世界上有那一种战争 那一种宗教的力量,能达到像长期挂水输液这样多功能的副效果作用力。

If hospitals around the world pay attention to the method of long-term infusion with water, it can be predicted that the world will return to the per capita mortality rate of patients 200 years ago, and the incidence rate of various diseases will also decrease. At the same time, it also solved a big problem intertwined in medicine and politics. Otherwise, there is a kind of war and a kind of religious power in the world, which can achieve the side effect force of multi-function like long-term hanging water infusion.

如南京回扬州的毛老太,一路坐公交车上没有一个人被传染,可她在扬州步行人群中,特别没有戴口罩的少数人被传染上病。当然戴口罩的好处,从科学角度讲,不是它有强大阻止住病菌的传染能力。而是它将冷热气流进入肺及身体内前,经口罩中和。如冬季天气冷 身体弱的人在外面时间长了,而且衣服穿得不当,,每一天呼吸时假定室外十五度,可身体内是约 35 度,被吸进身体肺内冷气,如每 5 秒钟吸进肺中一次若没口罩挡住,就吸入肺内的温度至少低肺内温度十五度,就可计算出约六个小时,肺受到多少次降温刺激,也将吸入的气扩散送给各器官使用,如最敏感的血管相当细,它不断受降温,血管中的血液就流速降慢,若是某一天受凉特别重,和平时积累的凉气相结合,就转化出身体内湿气逐步加重,经络不畅通。特别一些老弱如女士及病人,轻者感觉身体困没力气,重者感冒或者转化成病毒性感冒病。二,戴口罩实中和冷或热的气流刺激肺少了,也减少精神上的压力,不乱想如病菌感染入身体内,就增强意念的免疫力,人们就少生病。

For example, Old Madam Mao, who returned to Yangzhou in Nanjing, did not get infected on the bus all the way, but among the pedestrians in Yangzhou, a few people who did not wear masks were infected. Of course, the advantage of wearing a mask, from a scientific point of view, is not that it has a strong ability to prevent the infection of bacteria, but that it neutralizes the cold and hot air flow through the mask before it enters the lungs and body. If it is cold in winter and the weak person has been outside for a long time, and his clothes are not properly dressed, he should assume that the temperature is 15 degrees outside and 35 degrees inside his body when he breathes air every day. If he inhales air into his lungs once every five banknotes, if there is no mask to stop him, he will inhale the temperature in his lungs at least 15 degrees lower than the temperature in his lungs, which can calculate how many times his lungs are stimulated by cooling, and also spread the inhaled air to each worker for use. If the most sensitive blood vessel is quite thin, it will be cooled continuously, and the blood flow in the vessel will slow down. If the blood vessel is particularly cold on a certain day, combined with the cool air accumulated in peacetime, it will be transformed into the body moisture gradually increased, and the meridians will not be unblocked. In particular, some old and weak people, such as women and patients, feel sleepy and weak, while the serious people have a cold or become infected with viruses. 2、 Wearing a mask can reduce lung irritation caused by cold or hot airflow. It also reduces the mental pressure, and does not want to infect the body with germs, so as to enhance the immunity of the mind, and people will get sick less.

当然在家里相当于恒温,可以不戴口罩。否则戴口罩时间太长,易增加特别年老体弱人肺压力和面部易受感染。

Of course, it is equivalent to constant temperature at home, so you can not wear a mask. Otherwise, wearing a mask for too long will easily increase the lung pressure of especially old and weak people and make their faces vulnerable to infection.

如南京毛老太去扬州有百十个人的大棋牌室 连续打麻将四天才去医院治病。可非常时期核酸检测阳性,医生当作传染病潜伏期类型治。医生若是按照病毒性感冒隔离治病,可能后果小些。

For example, Old Madam Mao in Nanjing went to Yangzhou to play mahjong in a big chess and card room with hundreds of people for four days. It can be positive for nucleic acid detection during an emergency period, and doctors can treat it as an incubation type of infectious disease. If the doctor treats the disease according to the isolation of viral cold, the consequences may be smaller.

而且常专家建议封小区,因此扬州严控深查及封了一个个小区,造成了扬州人恐怖感更大,人们意念

的作用力,从此扬州十万个人多了几个发病率,特别棋牌室上百个人中也有发病率。

Moreover, experts Chang suggested closing the residential areas. Therefore, Yangzhou strictly controlled the investigation and closed the residential areas one by one, resulting in a greater sense of terror among Yangzhou people and the force of people's minds. Since then, 100000 people in Yangzhou have several more incidence rate, especially among hundreds of people in the chess and card room, there is also a incidence rate.

经深查一些外地小区与病人接触过的几个省市的人员中,也有少数的发病率,从此全国还在增长发病率。

Through in-depth investigation, a few people in several provinces and cities who have contacted patients in some other communities also have a small number of incidence rate, and since then the incidence rate has increased throughout the country.

这些病人是传染性病?还是病毒感冒?是病人之过,还是常专家建议封小区之过,还是医学或医生之过,还是扬州迷信专家建议封小区之过?还是原本是为了解决该种疾病的发病机理、传染途径,是极具意义的医学事件,也是科学事件,是被媒体过度操作之过?

Are these patients sexually transmitted diseases? Or a viral cold? Is it the fault of the patient, or is it the fault of the community that is often recommended by experts, or the fault of medicine or doctors, or is it the fault of Yangzhou superstitious experts? Or was it originally intended to solve the pathogenesis and infection route of this disease, which is a very meaningful medical event, a scientific event, and a fault of being over manipulated by the media?

可能实际并没有足够证据能够证明毛老太,将病毒传染到大半个中国了。也是第五个有成效发病率的溯源。

Maybe there is not enough evidence to prove that Madam Mao has transmitted the virus to most of China. It is also the source of the fifth effective incidence rate.

如美国每一年冬季十万个人有几个发病率,而且每一年正常死亡率是百分之八。美国人口约 3 亿 3 人口来进行计算,除去这个正常年份发病率和死亡率,就知道美国网络公布那么多新冠肺炎发病率和死亡率,猫腻特别大忽悠人的计。

For example, there are several incidence rate rates for 100000 people in the United States every winter, and the normal mortality rate is 8% every year. The population of the United States is about 303 million. In addition to the incidence rate and mortality rate in this normal year, we know that there are so many COVID-19 incidence rate and mortality rates published on the Internet in the United States, which is a big trick to fool

people.

就是它们知道不是真正的传染病。美国政府不强制封城封小区,才将 2021 年工业总产值上升许多。

They know it is not a real infectious disease. The US government does not force the closure of urban areas, which will increase the gross industrial output value by a lot in 2021.

从以上事例已经说明这次疫情是有多方面因素造成。为什么发病率和死亡率非常高?是不是动物等传染的问题?通过以下数据来再说明问题的要害。

From the above examples, it has been proved that the epidemic is caused by many factors. Why are incidence rate and mortality rates very high? Is it a problem of animal infection? The key point of the problem is explained by the following data.

如 200 年前生病时,都喝热中药汤或贴膏药或针灸或拔火罐等方法治病。人们身体内没留下额外来的垃圾存放身体内。因此,人们就不容易生病,节使生病也好得快。可今天全世界都挂水输液治病和做防疫疫苗,因此长期使用后的副作用,如少年时生各种病机会少,而青年后已经受各种因素随着年令增长,导致生病机会多。

For example, when I was ill 200 years ago, I drank hot Chinese medicine soup or stuck plaster or acupuncture or cupping. People do not leave extra garbage in their bodies. Therefore, people are not easy to get sick, and the festival makes them better soon. But today, the world is using water infusion to cure diseases and make epidemic prevention vaccines, so the side effects after long-term use, such as fewer chances of various diseases when young, and the young have experienced various factors with the growth of years, lead to more chances of illness.

因无论男女如是六十岁期间,按他们身体棒和身体一般平均每三年生病一次。60 年期间挂水输液及注射疫苗药物中的小分子,存入身体各结构中越来越多。可身体的温度无法将药物中小分子转化成蛋白质之类,药物的部分小分子,就在身体内随血液循环。部分小分子被气流涡旋成细胞,也让小孩长高增胖,就是增加了体重。由于血液循环每分钟在身体内至少转几十转,这些药物小分子重量就多消耗人身体系统的作用力。因此人们身体实随年令越大,消耗作用力越多,若某人突然受凉或喝冷粥冷饭多了,这些因素立即使身体内湿气越来越重,经络不畅通,就使血液循环更受阻,多消耗身体系统作用力。

Because both men and women in their 60s generally get sick once every three years according to their physical fitness. During the 60 years, more and more small molecules were stored in various structures of the body. However, the body temperature cannot convert small molecules of drugs into proteins. Some small molecules of drugs circulate with the blood in the body. Some small molecules are whirled into cells by the

airflow, which also makes children grow taller and fatter, that is, they gain weight. Since the blood circulation rotates at least dozens of times in the body every minute, the small molecular weight of these drugs will consume the force of the human body system. As a result, people's bodies become larger and larger with each passing year, consuming more force. If someone suddenly gets cold or drinks more cold porridge and rice, these factors immediately make the moisture in the body heavier and heavier. If the meridians are blocked, the blood circulation will be more blocked, consuming more force of the body system.

因此常生病的人或 20 岁以上的人或富裕家庭的人,或常吹空调的人,或精神压力大的人,包括常注射疫苗及核酸检查的人,他们在疫情期间更容易生病,甚至病更严重。

Therefore, people who are often ill or over the age of 20, or people from wealthy families, or people who often blow air conditioners, or people with high mental stress, including people who often receive vaccines and nucleic acid tests, are more likely to get sick, or even worse, during the epidemic.

也希望不能将感冒发烧的病人,及正常年份都有老年病等各种病人的死亡率,宠统地报在冠状病毒的疫情网上发布,否则造成了发病率多后果,都应该受到法律制裁。

It is also hoped that the mortality rate of patients with colds and fever, as well as elderly diseases and other patients in normal years, can not be reported and published on the coronavirus epidemic website. Otherwise, the incidence rate will result in multiple consequences and should be subject to legal sanctions.

通过这次疫情,西医如治传染病和急性外科病,是拿手好戏,能快速治好病。西医对系统慢性病包括病毒病,长期若滥用挂水输液治疗,短时期看不出副作用后果问题。这就是医学理论不完善的问题。

Through this epidemic, western medicine is good at treating infectious diseases and acute surgical diseases, and can quickly cure the disease. Western medicine is used to treat chronic diseases, including viral diseases. If the drug is misused for a long time, no side effects can be seen in a short time. This is the problem of imperfect medical theory.

而中医对系统慢性病如癌病包括病毒病等病,中药有很好的效果,可几千年来中医仅以气和血建立理论。忽视人们体内约百分之七十是温水,气和血仅一小部分。而且原始能量的补充,还是来之正确用水多少和冷热水。

Traditional Chinese medicine has a good effect on systemic chronic diseases, such as cancer, including viral diseases. For thousands of years, traditional Chinese medicine has only established its theory with qi and blood. Neglect that about 70% of people's bodies are warm water, and only a small part of qi and blood.

Moreover, the supplement of original energy comes from the correct amount of water and cold and hot water.

当然中医用水煎中药,给病人喝热中药汤。有了热中药汤的热气,它是无孔不入,将身体内细胞膨胀大,就一个推挤另一个细胞,将几十亿个细胞推挤膨胀大,细胞壁之间的间穴更小,病人就有精神增加了力气,加快病好了。

Of course, traditional Chinese medicine decoct Chinese medicine with water and give patients hot Chinese medicine soup. With the heat of the hot Chinese medicine soup, it is all pervasive. It expands the cells in the body, pushing one cell to another, pushing billions of cells to expand, and the acupoints between the cell walls are smaller. The patient will have the spirit to increase his strength and speed up his recovery.

所以中西医理论必须统一建立在物理学上,双方医学理论得到提升完善后。治病时再灵活掌握利用水,治病的效果会更好,也没有副作用的大问题。

Therefore, the theories of Chinese medicine and western medicine must be unified based on physics. After the medical theories of both sides are improved and perfected. The effect of treatment will be better and there will be no side effects if we use water flexibly.

归纳说 这次疫情反映出 一 误诊,就是将季节性瘟疫病,认定传染病治和防。二 误治,应该是热水服药,可采取挂水输液治病,长期性就引出后果问题。三 误导,将正常年份各种病的发病率和死亡率,宠统报导成新冠肺炎病毒病,造成后果甚至超过传染病几倍。四 老百姓轻信如冬季每一天自来水冲洗手几次消毒。而且病毒怕高温,家里如空调温度高点等,这样做,也引出发病率增高。溯源一,气候环境冷或热变化,二 挂水输液进入身体内,不是进入胃处理。三 媒体过度宣传,四 没有治病作用的核酸检查和疫苗不是雾化吸入式防疫药,及有人操纵发病率,都是溯源来源几个方面的问题。仅供参考。

To sum up, this epidemic situation reflects a misdiagnosis, that is, treating and preventing seasonal plague as an infectious disease. Second, the wrong treatment should be hot water medication, can take water infusion treatment, long-term leads to consequences. 3. Misleading, Chong Tong reported the incidence rate and mortality rate of various diseases in normal years as COVID-19 virus disease, causing consequences even several times more than infectious diseases. 4. People are credulous, such as washing their hands with tap water several times a day in winter. And the virus is afraid of high temperature, such as the high temperature of the air conditioner at home, which also leads to an increase in the incidence rate. First, the climate and environment changed in cold or heat. Second, the water was injected into the body, not into the stomach. Three media over propaganda, four nucleic acid tests and vaccines that have no therapeutic effect

are not aerosol inhalation anti epidemic drugs, and some people manipulate the incidence rate are all problems of traceability. For reference only.

从以上数据再不能侥幸某一天疫情就到拐点。节是波浪式到了拐点，五个月后又到冬季或夏季的发病率高峰期，甚至再被人操纵或宣传疫情的传染能力，疫情就永远结束了。

From the above data, we can no longer hope that the epidemic will reach the inflection point one day. The festival is a wave to the inflection point. Five months later, it will reach the peak of incidence rate in winter or summer, and even be manipulated or publicized for the infectious ability of the epidemic, and the epidemic will never end.

清零躺平，都不是中国结束疫情政策，因时间就是金钱，就是病人的生命，及就是中国抗疫的荣誉。因中国已有两年多疫情经验，如卫健委每一天报导出来的发病率，没有天天成倍涨。证明是季节性瘟疫病，没必要做防传染病的防疫工作。顺应天意，国家立即宣布，从现在起全国结束防新型冠状病毒传染病工作，各行各业恢复到疫情前工作和生活中去，每个人做好防生病的工作，防疫站和医院做好防疫和治病工作，从此媒体只许报各行各业大干四化的新气象。劳动人民就甩开膀子忙苦钱，就财发精神爽，一正压百邪、疫情胜利结束。

Clearing up and lying flat is not China's policy to end the epidemic, because time is money, is the life of the patient, and is the glory of China's epidemic resistance. Because China has more than two years of epidemic experience, such as the incidence rate reported by the Health Commission every day, it has not doubled every day. It is proved that it is seasonal plague, so it is unnecessary to do epidemic prevention work against infectious diseases. Conforming to the will of God, the country immediately announced that from now on, the prevention of COVID-19 infection throughout the country will be ended, and all walks of life will return to their pre epidemic work and life. Everyone will do a good job in disease prevention, and epidemic prevention stations and hospitals will do a good job in epidemic prevention and treatment. From now on, the media will only report the new phenomenon of "four modernizations" in all walks of life. The working people will get rid of their hands and work hard to make money. They will feel refreshed when they get rich. Once they get rid of all evils, the epidemic will end successfully.

国家宣布结束疫情权威性高。靠基层任何人也担不起责任。常态化，增加人们精神压力，易被人操纵疫情发病率。或全国人民投票多少决定疫情结束。

The country's announcement of the end of the epidemic is highly authoritative. Nobody at the grass-roots level can take responsibility. Normalization increases people's mental pressure and is easy to manipulate the incidence rate of the epidemic. Or the

people of the whole country will vote how much to end the epidemic.

当然,今天结束疫情不是一件简单事,这要国家列入办案程序一样,首先组织医疗专家组,再核查2020年到2021年的现在,凡是刚住进医院治疗的病人中,有多少病人是属真正新型冠状病毒传染病的病人?就知道疫情的问题,若是得到如:

Of course, it is not a simple matter to end the epidemic situation today. It requires the same national case handling procedures. First, organize a medical expert group, and then verify that from 2020 to 2021, how many of the patients who have just been admitted to the hospital for treatment are patients with a real new type of pneumonia virus infection? We know the epidemic situation. If we get the following information:

1月12日,河南警方发布了这样一则警情通报:

On January 12, the Henan police released such a notice:

经公安机关调查,郑州金城临床检验中心有限公司区域负责人张某东违反传染病防治法的规定,实施引起新型冠状病毒感染肺炎传播或有传播严重危险的行为。禹州市公安局于2022年1月10日,对张某东以涉嫌刑事犯罪立案侦查并采取强制措施。目前该案正在进一步办理中。

After investigation by the public security organ, Zhang Moudong, the regional head of Zhengzhou Jinyu Clinical Test Center Co., Ltd., violated the provisions of the Law on the Prevention and Treatment of Infectious Diseases, and carried out acts that caused the spread of novel coronavirus pneumonia or posed a serious risk of transmission. On January 10, 2022, Yuzhou Public Security Bureau put Zhang Moudong on file for criminal investigation and took coercive measures. At present, the case is being further handled.

让全国人民都知道,如国家仅为核酸检测和注射疫苗共用多少亿元,确发病率越来越多等问题,就能立即发病率猛降,死亡率也大降。

Let the people all over the country know that if the country only shares hundreds of millions of yuan for nucleic acid testing and vaccine injection, and it is sure that the incidence rate is increasing, the incidence rate and mortality will immediately plummet.

为了避免今后少出现疫情,国家下发一些文件到各地方政府及卫健委,如每到冬季和夏季自然规律,每十万个人以上定有几个发病率。若突然发病率和死亡率快速增加,属于什么类型病是科学问题,先由各地方卫健委专家们去处理鉴定属于什么类型病。如上海人口密集大城市十万个人以上,十天内平均值超过发病率七个人,中等城市十天平均值超过六,小城市十天平均值超过五,甚至达到一倍时,要上报各城市地方政府有关部门一次,并且卫健委要写书面疫情报告,说明这次疫情性质如指出可能属传染病,发展动态和卫健委可控能力及治疗能力给地方政府。

政府有关部门得到这份资料,就着手重视事件发展动态做好最坏预案,便与第一时间向国家有关部门汇报,请他们研究如需要不需要采取封城等措施,作指导意见。

In order to avoid less outbreaks in the future, the country has issued some documents to local governments and health committees. For example, every winter and summer, there will be several incidence rate for every 100000 people or more. If the incidence rate and mortality rate suddenly increase rapidly, the type of disease is a scientific question, and experts from local health committees should first deal with and determine the type of disease. For example, if there are more than 100000 people in a densely populated big city in Shanghai, the average value in ten days exceeds the incidence rate of seven people, the average value in ten days in a medium-sized city exceeds six, and the average value in ten days in a small city exceeds five, or even doubles, it should be reported to the relevant departments of the local governments of each city once, and the Health Commission should write a written report on the epidemic situation, stating that the nature of the epidemic situation, if pointed out, may be a communicable disease, The development trend and the controllable ability and treatment ability of the Health Commission are given to the local government. After receiving this information, the relevant government departments began to pay attention to the development trend of the event and prepare the worst plan. They immediately reported to the relevant national departments, asking them to study whether it is necessary to take measures such as closing the city, if necessary, for guidance.

若已经几天内猛升,甚至发病率达到了两倍。而且包括医院死亡率超过收治的病人六分之一,及发现大量动物也是发病率和死亡率猛增。这时已证明是传染病,政府必须组织力量和救灾物资投入。还进一步查清发病率和死亡率具体原因。如是有人操纵发病率还是传染病问题?另一方面采取那些果断措施,如首先将重发病区的病人全封密治疗处理。并且得到上级批准,才能再执行封城还是封某一个小区或封某一个机场。地方政府是没有直接权封城。

If it has soared within a few days, even the incidence rate has doubled. Moreover, the hospital mortality rate exceeded one sixth of the patients admitted, and the discovery of a large number of animals also led to a sharp increase in incidence rate and mortality. At this time, it has been proved to be a disease of epidemic disease, and the government must organize forces and input relief materials. The specific causes of incidence rate and mortality were further identified. If someone manipulates the incidence rate or infectious disease? On the other hand, those decisive measures should be taken, such as first sealing up all patients in the reoccurred

ward for treatment. Only with the approval of the superior can we close the city, a certain community or an airport. The local government has no direct right to seal the city.

地方政府这样做,才能更科学地掌握疫情真实情况,作出正确的组织措施。而且不扰大多数人民工作和生活环境。并且能及时掌握若是人为操纵疫情,绝不手软。也可避免擅自封城封小区,造成不必要的经济损失。

By doing so, local governments can more scientifically grasp the true situation of the epidemic and make correct organizational measures. And it will not disturb the working and living environment of most people. And can grasp in time if the human manipulation of the epidemic, never soft. It can also avoid unnecessary economic losses caused by self sealing of urban areas.

政府若疫情发病率短期达到两三倍,不立即介入,或没有得到上级部门批准,就擅自封城,政府有关部门和主要领导人就要追责。

If the incidence rate of the epidemic reaches two or three times in a short period of time, the government does not intervene immediately, or does not get the approval of the superior department, it is good to self declare the city, and the relevant government departments and major leaders will be held accountable.

若是国家卫健委,不及时给地方政府部门指导疫情,是传染病还是季节性流行病,甚至要指出流行病指定中医院定点治病。是传染病指定西医定点医院治病,及是否需要封城等处理的意见,若不及时回复给地方政府。都要受到逐级追责。

If the National Health Commission fails to give timely guidance to the local government departments on the epidemic situation, whether it is an infectious disease or a seasonal epidemic, it may even point out that the epidemic disease is treated by designated TCM hospitals. It refers to the opinion on whether the designated western medical hospital is designated for treatment of infectious diseases, and whether it is necessary to close the city. If it is not timely replied to the local government. They should be held accountable step by step.

因必须要发挥中央集权制管理的优势,才能使各项工作有条不紊顺利开展和取得优异成绩。

Because we must give full play to the advantages of centralized management, so that all work can be carried out orderly and smoothly and achieve outstanding results.

若全世界或全国甚至某地区,连续四天没有发现生新冠病毒的发病率,而且这批生冠状病毒的病人大多数病人已经出院。国家下发文件要求各医院,今后不再用如阳性或疑似病人,再回到以前的医学名词,如感冒或病毒性感冒发烧等病种。因一个人生病,只要如在浴室洗澡后身体太热,穿单衣时间长,或吹空

调或吹电风扇 或喝了冰箱里冷饮料一并,或吃冷粥一碗,就休息或睡觉,约五十分钟后就生病或发烧。不存在病毒潜伏期的问题。就直接宣传做好防生病和治病的工作。

If there is no incidence rate of COVID-19 for four consecutive days in the world or in the country or even in a region, and most of these patients have been discharged. The state issued a document requiring hospitals to stop using positive or suspected patients in the future and return to the former medical terms, such as cold or viral cold fever. Because a person is ill, if he is too hot after taking a bath in the bathroom, wears a single coat for a long time, or blows the air conditioner or electric fan, or drinks cold drinks in the refrigerator, or eats a bowl of cold porridge, he will rest or sleep, and will get sick or have a fever about 50 minutes later. There is no problem of virus incubation period. We will directly promote the prevention and treatment of illness.

另下发指导疫情的文件也要注意如下

In addition, we should also pay attention to the following documents to guide the epidemic situation

【全民抗“疫”】德尔塔毒株传播快传染强,自我健康防护要加强;常通风、戴口罩,七步洗手不能少;一米线、不聚集,社交距离要保持;早报告、不隐瞒,坚持测温早就医;受管控、多理解,积极配合管控查;不出门、陪家人,健康亲情两不误;好地方、我的家,守护健康靠大家。(xxx 疫情防控指挥部宣)

[The whole people fight against the "epidemic"] The delta virus strain spreads quickly and is highly infectious, and self health protection should be strengthened; Always ventilate, wear masks, and wash hands in seven steps; One meter line, no gathering, social distance should be maintained; Report early, do not conceal, insist on temperature measurement and get medical treatment early; Be controlled, understand more, and actively cooperate with the control inspection; Do not go out, accompany your family, and keep your family healthy; A good place, my home, health depends on everyone. (Publicized by xxx epidemic prevention and control headquarters)

若是按照这个七步洗一次手建议去做,正常的人也会被连续十多天一次次冬天的冷水 冷气进入身体内,同身体内温度差就进化成身体内湿气一天天加重,若再常在家里天天吹空调保暖和或夏季降温时间长了,电磁波也会干扰人们神经系统休息,约半个月左右,特别女士们,她们的基因是向心力,意念感作用力大,就易少数人生感冒甚至是发烧等病。

If you follow the seven step hand washing proposal, normal people will also be exposed to cold water and cold air for more than ten consecutive days in winter, and the temperature difference between the same body and the body will evolve into that the humidity in the

body will increase day by day. If you blow the air conditioner every day to keep warm or cool down in summer for a long time, electromagnetic waves will also interfere with people's nervous system rest. About half a month, especially women, their genes are centripetal force, With a strong sense of mind, it is easy for a few people to catch a cold or even have a fever.

建议国家每当流行病季节前,将以下防病治病和如何养生保健,及国家有关疫情防控措施及法律等资料,汇编做成一本小册子书,发放到每家每户一本书。就从源头做好防疫工作。

It is recommended that the country compile the following information on disease prevention and treatment, health care, and national epidemic prevention and control measures and laws into a booklet before each epidemic season, and distribute it to each household. We will do a good job of epidemic prevention from the source.

提倡夏季用电风扇降温,冬季和夏季慎用空调,如不要高出 18 度, [包括飞机火车等公共场所,均按季节开空调。甚至飞机上温度还要飞往北方还是飞往南方某个城市的,当天气温进行客机舱内空调的温度进行调整。旅客身体内就转化出湿气少了,若下飞机后所有乘客在机场指定宾馆休息睡觉再住一夜,也不要吹空调。不许喝冰箱里冷饮料不吃冷食,床面暖和睡午觉,每天喝热茶水两三次,出门戴口罩,脚上穿袜子,若冬季出门男女老少还要戴帽子。冬 春秋季每个星期去浴室洗一次热水澡,每天原地跑十几步,就增强免疫力。防治百病效果好。

It is recommended to use electric fans to cool down in summer, and use air conditioners carefully in winter and summer. If the temperature is not higher than 18 degrees, [Air conditioners are turned on in public places, including flights and trains, according to seasons. Even if the temperature on the plane is to fly to the north or to a city in the south, the temperature of the air conditioner in the passenger cabin will be adjusted when the weather is warm. There will be less moisture in the passenger's body. If all passengers take a rest and sleep in a designated hotel at the airport after getting off the plane, do not blow the air conditioner. It is not allowed to drink cold drinks in the refrigerator without eating cold food, and the bed surface will be warm and take a nap in the afternoon Drink hot tea two or three times a day, wear masks and socks when going out, and wear hats when going out in winter. In winter, spring and autumn, go to the bathroom once a week to take a hot bath, and run ten or more steps every day to strengthen your immunity. The effect of prevention and cure is good.

另飞机场要安排下飞机的旅客,先住机场指定的宾馆休息睡觉一夜,每个旅客可以多放茶叶用开水冲泡一杯热茶,三分钟后将热茶喝下肚,热茶水有防疫治病和保健身体作用。睡觉前冬天床面上放暖和

些睡觉,也是对旅客负责。若是下飞机后就去做核酸检查,机舱内温度和外面当地温度差,旅客身体弱的人,立即开始湿气加重到约四十分钟后,核酸检查容易过不了关。先在机场指定宾馆睡一夜觉,再做核酸检查,甚至个个旅客身体健康。也做好防治两不误的工作,外国的疫情进不了中国,国门直接可以畅开。

In addition, according to the passengers who are scheduled to get off the plane at the airport, they should first stay in the hotel designated by the airport to have a night's rest. Each passenger can put more tea leaves and brew a cup of hot tea with boiling water. Three minutes later, they can drink the hot tea. The hot tea water has the functions of epidemic prevention and treatment and health care. It is also responsible for the passengers to keep the bed warm in winter before going to bed. If you go for nucleic acid inspection after getting off the plane, the temperature in the cabin is different from the local temperature outside, and the passengers who are weak begin to get damp immediately, and the nucleic acid inspection is easy to fail after about 40 minutes. First, sleep in a designated hotel at the airport, and then do nucleic acid tests. Even all passengers are in good health. We should also do a good job in preventing and controlling the epidemic. Foreign epidemics cannot enter China, and the country can directly open its doors.

老中医姜教授的药方, 附方一 肺炎方, 预防这次武汉肺炎药方, 生黄芪 9 克, 北沙参 9 克, 知母 9 克, 连翘 12 克, 苍术 9 克, 桔梗 6 克, 水煎服剩热喝, 连服 6 天, 预防这次武汉肺炎。病好得快, 也没副作用。这个方子, 是北京中医药大学姜教授的这次开的方子, 中医有祖训: 逢瘟疫时, 预防和治疗的方子无条件公开, 不得靠这个赚没良心的钱把这个药方传出去。献爱心!

The prescription of Professor Jiang, an old Chinese doctor, is attached with a pneumonia prescription to prevent this Wuhan pneumonia. The prescription includes 9 grams of raw astragalus, 9 grams of sea cucumber, 9 grams of anemarrhena, 12 grams of forsythia, 9 grams of atracylodes macrocephala, 6 grams of platycodon grandiflorum, which is boiled in water and left hot to drink for 6 days to prevent this Wuhan pneumonia. Get well quickly without side effects. This prescription was prepared by Professor Jiang of Beijing University of Traditional Chinese Medicine. There is an ancestral motto in Chinese medicine: in case of plague, the prescriptions for prevention and treatment should be made public unconditionally, and it should not be spread out with such heartless money. Love!

附方二 根据德尔塔病毒, 传播快, 症状发展快, 又是燥热地区产生, 但依旧是当先犯肺, 咳嗽早, 发热快, 容易磨玻璃影的特点, 我认为: 快为风盛, 燥为热盛, 初期处方, 清瘟肃肺: 荆芥 20g 百部 30g 紫菀 30g 白前 18g 陈皮 12g 桔梗 12g 双花 30g 浙

贝 18g 黄芩 12g 生石膏 50g 僵蚕 18g 甘草 18g 舌蛇草 30g 草河车 18g 元参 30g 小儿酌减! 随后, 张愈老中医又发来信息: 随缘度众, 不要张扬, 济世救民, 但不愿惹事生非!

According to the characteristics of Delta virus, which spreads quickly, develops rapidly, and is also produced in hot and dry areas, but is still the first to attack the lung, cough early, fever lump, and easy to get rid of glass shadow, I think: fast is the wind, dry is the heat, initial prescription, Clearing away the plague and eliminating the lung: Schizonepeta tenuifolia 20g, Baibu 30g, Aster root 30g, Baiqian 18g, Chenpi 12g, Platycodon grandiflorum 12g, Shuanghua 30g, Zhebei 18g, Scutellaria baicalensis 12g, Gypsum plaster 50g, Bombyx mori 18g, Glycyrrhiza uralensis 18g, Snake weed 30g, Caohe cartwheel 18g, Ginseng and 30g, Take care of children! Later, Zhang Yu, an old doctor of traditional Chinese medicine, sent a message: Follow the circumstances to help others, don't make public, help the world and save the people, but don't want to make trouble!

附方三 新冠肺炎防治方 (甘肃榆中 张愈)

荆芥 20g 百部 30g 紫菀 30g 白前 18g 陈皮 12g 桔梗 12g 姜半夏 15g 双花 30g 浙贝母 18g 板兰根 20g 甘草 15g 舌蛇草 30g 草河车 18g 黄芩 12g 生石膏 50g 苏梗 20g 旋复花 20g (包煎) 元参 50g 无高烧去石膏, 咳不剧去苏梗、旋复花, 咽不痛去元参。

Attachment: Sanxin Coronary Pneumonia Prevention and Treatment Recipe (Zhang Yu, Yuzhong, Gansu)

Schizonepeta tenuifolia 20g Baibu 30g Aster 30g Baiqian 18g Chenpi 12g Platycodon grandiflorum 12g Ginger Pinellia ternate 15g Shuanghua 30g Fritillaria thunbergii 18g Banlangen 20g Glycyrrhiza 15g Snake grass 30g Caohechela 18g Scutellaria baicalensis 12g Gypsum plaster 50g Su stem 20g Convolvulus flower 20g (fried) Yuanshen 50g No high fever Remove the plaster, cough is not serious Remove the Su stem, convolvulus, swallow is not painful Remove the Yuanshen.

此方为成人量, 八岁以上儿童减半, 五岁以下三分之一量, 服后便稀溏为宜。一付一日退热, 三付三日咳止, 十付十日 CT 化验正常为愈, 作为评判标准。本方以新型冠状病毒肺炎主症干咳、发烧、乏力、咽痛而设, 以一个中医的职责任报国救民、治病救人, 没有任何名利之图, 也不接受任何不良攻讦。

This prescription is for adults, half for children over eight years old, and one third for children under five years old. It is appropriate to take it with loose stools. One pay for one day to relieve fever, three pay for three days to stop coughing, and ten pay for ten days. If the CT test is normal, the patient will recover, which is the evaluation standard. This prescription is based on the

main symptoms of the new type of coronary pneumonia, such as dry cough, fever, fatigue, and sore throat. It serves the country, saves the people, and cures the sick with a sense of responsibility of traditional Chinese medicine. It does not seek fame or gain, nor does it accept any bad criticism.

单方土法,不可轻视。应配合科学试验,化验理论,使其发扬光大,这对医疗利益化非常有效,对应地区性瘟疫更是近水楼台,也可推荐夏季提倡用电风扇降温,不吃冰箱里冷食不喝冷饮料,冬天气候寒冷,要穿如羽绒服之类保暖和轻衣服和棉鞋。少穿皮衣皮鞋。少用慎用空调。因电磁波会干扰神经系统休息。也使身体内受到冷或热转化出湿气多易生病。冬季出门要戴口罩,也要戴帽子。冬 春 秋都要每一星期浴室洗澡一次,洗澡后不能睡在空调下睡觉或洗澡后不能受凉 50 分钟以上,每天原地跑十几步,心里烦就唱几首歌,或只回想人生幸福愉快的事,若脚心热是肾阴虚的人,就多放点红茶,若身体强随你放绿茶或红茶进茶杯中,或炒焦的大麦冲入热开水,约两分钟后,剩热喝,或每天少食多次喝热的豆浆几次,继当茶又当饭了,中午睡午觉,能防感冒和加快感冒好,以上也能增强身体免疫力。

Unilateral local laws should not be disregarded. We should cooperate with scientific experiments and test the theory to make it carry forward. This is very effective for the benefit of medical treatment. It is also close to the water to deal with regional plagues. It can also be recommended to advocate the use of electric fans to cool down in summer, not eat cold food in the refrigerator and not drink cold drinks. In winter, when the weather is cold, we should wear warm and light clothes such as down jackets and cotton shoes. Avoid wearing leather clothes and shoes Use the air conditioner sparingly. Because electromagnetic wave will interfere with nervous system rest. It also makes the body susceptible to cold or hot moisture. Wear masks and hats when going out in winter. In winter, spring and autumn, you should take a bath once a week in the bathroom. After taking a bath, you should not sleep under the air conditioner or get cold for more than 50 minutes. You should run ten or more steps in the same place every day. If you are upset, you should sing a few songs or just recall the happy things in life. If you have a hot foot, you should put more black tea. If you are strong enough to put green tea or black tea into a tea cup, or if you want to put fried barley into hot water, about two minutes later, you can drink hot tea, Or eat less and drink hot bean porridge for several times every day, and then serve as tea and rice. Taking a nap at noon can prevent colds and speed up colds. The above can also enhance the body's immunity.

再补充国家有关疫情文件.每个人业余时看到文件后,就直接做好个人防病治病早期的工作。政府有关部门就要敢当 大胆地宣布新冠病毒病,在中国胜

利结束了。

The relevant national epidemic situation documents will be supplemented When everyone sees the documents in his spare time, he will directly do the early work of personal disease prevention and treatment. The relevant government departments should boldly announce that COVID-19 is over in China.

一 政府的各种新闻媒体,要大力宣传各行各业新气象,及好人好事 鼓于劲。不允许任何媒体再宣传有关疫情各种信息. 谁违反立即受到法治惩办。

1. The various news media of the government should vigorously publicize the new atmosphere in all walks of life and encourage good people and good deeds. No media is allowed to publicize any information about the epidemic Those who violate the rule of law will be punished immediately.

二 要求全国各行各业立即做好全面恢复到,以前那样工作环境和生活学习环境中去. 包括学生全部返校上学,教学质量才能有所提高,也就带动各行各业市场经济活跃起来,个个投入到大干四化伟大的事业中去!

2. all walks of life across the country should be restored to the same working, living and learning environment as before Only when all the students go back to school can the teaching quality be improved, can the market economy in all walks of life be activated and everyone be devoted to the great cause of the four modernizations!

三, 要求广大医务人员和防疫站及各级地方政府有关工作人员,思想上不能麻痹放松疫情,要做好一切防病治病的工作。

3. It is required that the majority of medical personnel, epidemic prevention stations and relevant staff of local governments at all levels should not relax the epidemic situation in mind, and should do a good job in disease prevention and treatment.

四 今后若发生某地传染性疫情,需要封城封路的 必须要有当地连续发生多次多人和牲畜死亡,而且要经当地专家们技术上确定是传染病,并写出书面材料上报省级以上政府. 政府再派出主管部门专家组,到当地进一步核实无误,政府才批准首先将暴发疫情地段封闭阻断同外界流通. 进行重点治疗传染病,任何人和任何地方部门,未经省级以上政府批准,是无权封城封路。

4. In the future, if there is an infectious disease in a certain place, and the city and road need to be closed, there must be multiple deaths of people and livestock in the local area, and the local experts must technically determine that it is an infectious disease, and write written materials to report to the government at or above the provincial level The government then sent an expert group from the competent department to the local area to further verify that there was no error. Then the

government approved to first close the outbreak area and block the circulation with the outside world No one or any local department has the right to close a city or a road without the approval of the government at or above the provincial level for the key treatment of infectious diseases.

五 不信谣不传谣,不做违法乱纪的事。

5. Do not believe rumors, do not spread them, and do not violate laws and disciplines.

六 要做好疫情期各地方人士捐款捐物工作。也要做好受疫情影响,使各方人员收入少,特别春节前给贫困人员和残疾人员,给予救济补助费。

6. people from all walks of life should do a good job in donating money and materials during the acid crisis. It is also necessary to be well affected by the acid situation to reduce the income of people from all walks of life. In particular, before the Spring Festival, poor people and disabled people will be given relief subsidies.

七 要大力宣传正能量,要求广大青少年向好人好事学习,要爱国爱劳动,献身于四化大业。

7. we should vigorously promote positive energy, require young people to learn from good people, love their country and work, and devote themselves to the four modernizations.

八 任何单位或个人,不准借疫情之机夸大宣传危害性,或高价推销他们产品或商品.一旦发现必将严惩。

8. No unit or individual is allowed to exaggerate the harmfulness of the epidemic, or sell their products or commodities at high prices. Once found, they will be severely punished.

九 如清朝时北京城里发生强烈地震,光绪皇帝用戒杀生或放生多少日,有些皇帝打开国库放粮救济灾民.有些皇帝特赦一批犯人.都是缓和社会矛盾.形成的怨气、恨气、怨气冲向天空少了,发病率也减少.如再到冬季和夏季都是发病率的高峰期,一些人就利用不了疫情.否则,结束不了疫情.就不利于生产力发展,就影响社会的安定团结。

9. For example, when a strong earthquake occurred in Beijing during the Qing Dynasty, Emperor Guangxu killed or released animals with military weapons for many days, and some emperors opened the state treasury to release food to relieve victims. Some emperors made a lot of prisoners. They all ease social contradictions. There is less forgiving, hating, and resentful gas rushing into the sky, and the incidence rate is also reduced. If winter and summer are the peak of incidence rate, some people will not be able to take advantage of the epidemic. Otherwise, the epidemic will not end It is not conducive to the development of productive forces and affects social stability and unity.

因我有经验了 2020 年一日 14 号起,就在头条和看点快报上共发上千条评论,如这次病不是传染病,

中医能治好,西医只要不挂水输液,喝热水口服西药片,也能治好这次病等建议。

Because I have experience, since the 14th day of the first day of 2020, I have published thousands of comments on the headlines and news bulletins. For example, if this disease is not an infectious disease, Chinese medicine can cure it, and western medicine can cure it as long as it does not use water for infusion and drinks hot water to take western medicine tablets orally.

如 2003 年广州发生了非典时,我见扬州时报上北京副市长抓非典疫情不力,被免去职务,而且扬州也封路,我早上看完报纸,立即写建议信并用挂号信寄给温总理 大标题 请求立即解除对非典不当做法 以免被坏人利用,内容约两张纸,并以个人生命作担保我建议的正确性.[中南海信箱]收到信后,温总理立即以组织措施解除非典病毒所做的封路等措施,并只许媒体报导各个单位复工,好人好事好新闻在网上,否则造成后果,都要受到法律制裁 从此后没有非典病.若挂号信若迟到一天,北京飞机场上的飞机甚至就停飞。

For example, when SARS broke out in Guangzhou in 2003, I saw in the Yang 30 inch newspaper that the deputy mayor of Beijing was not able to catch the SARS epidemic and was removed from his post, and Yangzhou was also closed. After reading the newspaper in the morning, I immediately wrote a letter of recommendation and sent a headline to Premier Wen by registered letter, requesting that the improper practices against SARS be immediately lifted to avoid being used by the people around. The contents were about two pieces of paper, and my personal life was used as a guarantee for the correctness of my proposal [Zhongnanhai Mailbox] After receiving the letter, Premier Wen immediately took organizational measures to remove the road closure caused by the SARS virus, and only allowed the media to report the resumption of work in various units. Good people, good deeds and good news were on the Internet, otherwise they would be subject to legal sanctions. Since then, there will be no SARS. If the registered letter is one day late, the plane at Beijing Airport will even be grounded.

本文章仅供专家们参考.本人不会写作,仅尽科学职责 和感报国救民,不存在有伤害某一方的动机,也没有任何名利之图,也不接受任何不良攻讦.因我是残疾证老人。

This article is only for experts' reference. I will not write. I will only do my scientific duty and serve the country and save the people. There is no motive to harm a party, no fame and fortune, and no negative criticism. Because I am an old man with a disability certificate.

西医挂水没有中医煎药水喝的好。

而且这次更需要中医标本共治。如古代一次次瘟疫都是中医大显身手治病。时间就是生命，必须要立即落实具体的事，才事半功倍夺取全面胜利。因我民科，说话没官科作用大。所以请习主席定夺！

内容简介

Content introduction

月球医生书, 是破译东方神秘主义太极八卦图的科学原理, 以浅显的文化, 集寓教于乐贯穿始终, 专门为广大青少年和科研爱好者及发明家们等人, 定制打造当今科学世界更令人惊叹新知识, 让你通过本书阅读对宇宙对世间从无到有、从有到无等许多重大世界难题, 用最少的的时间得最多的新科学知识

来充实自己、解放自己, 做一个能力超群的万事通。如先了解宇宙的创生、地球山脉、水的产生, 植物、动物等许多世界难题。特别如白血病、癌病、艾滋病、强直性脊柱炎及新冠肺炎病毒等病的患者, 提供了防病和治好病及延年益寿的经验。

The lunar doctor's book is the scientific principle of deciphering the Oriental mystical Tai Chi Eight Diagrams. It combines education with fun through simple culture, and is specially designed for teenagers, research enthusiasts and inventors to create a more amazing new knowledge of today's scientific world. Through this book, you can read about many major world problems, such as the universe from scratch to the world, from there to there, Use the new scientific knowledge with the least time and the most to enrich and liberate oneself, and be a know it all with superior ability. For example, first understand the creation of the universe, the generation of earth mountains, water, plants, animals and many other world problems. In particular, patients with leukemia, cancer, AIDS, ankylosing spondylitis, COVID-19 and other diseases have provided experience in disease prevention and treatment and life extension.

更是科学家们众里寻她千百度, 从书中可得到启蒙, 从旧物理学中解放出来, 创造出更完整系统框架结构动态场的, 新物理学和新哲学等。也不乏适合各种人群消逝时光品读, 居家必备醍醐灌顶之作的百科书。

More importantly, scientists have searched for her thousands of times. They can get enlightenment from the book, liberate from the old physics, and create a more complete system framework, structure, dynamic field, new physics and new philosophy. There is also an encyclopedia suitable for all kinds of people to enjoy the lost time, which is a must for home.

谁先得到, 谁先受益。

Who gets first, who benefits first.
