

Dear Prof. Dr. Hongbao Ma,

The attached is a manuscript under the title of "Performance of an irreversible Diesel cycle under variable stroke length and compression ratio" which I wish to contribute to **The Journal of American Science**.

This paper focused on the FTT performance of an irreversible Diesel cycle with heat transfer irreversibility, and derived the analytical expressions about the power output and efficiency of the cycle.

The papers have not been published previously, they are not under consideration for publication elsewhere, and if accepted they will not be published elsewhere in substantially the same form, in English or in any other language, without the written consent of the Publisher.

I hope that you will find the papers interesting and worthwhile to be published by the journal.

A list of potential reviewers for the paper is enclosed.

Thank you in advanced for your cooperation.

Sincerely yours

Rahim Ebrahimi
Shahrekord University, P.O. Box 115, Iran
