

GOD's Mathematical Signs on Earth and in the Heavens

David Bruce Brenton

a22.5universe@outlook.com

Abstract: The measurement of the geological features of Earth, including mountain peaks, islands, coastlines, rivers, ancient archeological sites, and, Holy sites, using a protractor, ruler, and compass, along with a Mercator Projection map (used in navigation and aviation), that plainly show that their locations, which current science says should be random, are, in fact, aligned at the cardinal angles, and their divisors, based on the 360 degree protractor. With Easter Rapa Nui Island (first mapped Easter Sunday, 1722, meaning "Navel of the World") and its 90 degree north/south alignment with the intersect-point of the Dine' Tribe Holy Mountains in the Four-Corner states of Arizona/Colorado/New Mexico/Utah. With world famous Easter Rapa Nui Island as the center and starting-point of a geometric/geographic pattern and story, encompassing the globe, proving intelligent design and fulfilling ancient recorded prophesies.

1. Introduction:

GOD's Mathematical Signs on Earth and in the Heavens:

Intelligent Mathematical/Geometrical Location and Alignments of the Geological and Archeological Landmarks of Earth, and, that same Mathematical/Geometrical Pattern in the Astrophysical Landmarks of the Heavens, including: Stars, Nebulas, Kilonovas, Radio-Burst, Galaxies, and the Map of the Cosmos; Revealing a Story In Geometry-Based Pictographs Language, Constructed of Mountains and Galaxies, and even Our Very Histories and Holy Sites, That Tell A Message Uniting All People, Nations, and Religions, While Proving That The Historical Figure, Named, JESUS, Was/Is GOD's Son; Including, the Fulfilled Prophesies of The World's Tribes and Religious Texts, and more.

Since spoken and recorded history, mankind has told of GOD mathematically arranging the universe. This theme is a main part of many of the world's religion's and people's historical records. Holy Mountains, as well as the cardinal directions of the compass, are a common description all over Earth.

Many have shown isolated examples of geometry of the stars, planets, lay-lines of ancient sites on earth, and cities aligned in star-patterns, mountains in the shape of faces and things, even naming landmarks for the shape they look like. It is part of our nature to look for patterns, and is not a psychological defect.

With the advancements of satellite and aerial mapping of the Earth, and the advancements of observing and mapping the Heavens, these have given

people the opportunity to measure our world in a reliable way, as opposed to the hand-drawn maps of a few short years ago, which may leave doubt. (No credit to the internet, though, since their dominance comes from the destruction of our city mercantile infrastructure, main street mom and dad businesses, and the great Map Stores that every small city used to have, till only a few years ago. With "free" maps on the internet, this killed the advancement of print maps and their availability, leaving few choices. These papers will show that all mistakes are meant to be, though, so we forgive and learn.)

Of the many things these findings show, with mathematically-sound proof, from the start of the discovery process and riddle, is that all the world's local lore, to, the major religious texts and events, and names of places, are accurately prophesized in the very findings these papers report, supplying a historic narrative to the mathematic lines being drawn.

The story of deciphering these findings, is itself one of prophesy fulfillments and pre-planned destiny of every one of us (to an extent, for we can choose to do wrong to others, or, not do anything, or, to be good).

This is the marriage of Science and Religion, and, it is GOD's revelation, designed to humble mankind with HIS mind-expanding concepts, scale, details, and message. Forcing people to question all conclusions they had previously held as absolute, changing society by new facts and knowledge, nullifying past religious and political arguments, because they were based on half the story.

This paper will start with the introduction evidence, in summary form, which is also the start of

the story within the geometry. Every photo and page within is a book unto itself. Once these findings are introduced and understood, these and later books, volumes, will delve deeper into the details and side-stories of this message and riddle of GOD, which concludes with GOD's hilarious insult for all mankind, and another riddle for the world to unite and solve, as well as acting as an announcement at the return of JESUS, GOD's son, and the world's Savior, and Judgement Day (see old and new testaments and other world histories for the complete story).

2. Materials and Methods:

Using Satellite and Aerial Photograph Maps, in Mercator Projection, on printed paper, using the basic drafting tools of a 45 degree/90 degree triangle, and a 30/60/90 degree triangle, a ruler, a protractor, and a compass, viewed under natural light and a 100 Watt Incandescent lighting.

The first clues to be solved in this puzzle was the geological arrangement of the volcanoes of planet Mars, that reveal a geometric equation that divides the planet's circumference into 5 equal parts, plus, two other riddles connected to that geometric and the one on Earth. My first impressions was that this intelligent arrangement was a sign of an advanced civilization, attempting to save it's atmosphere and possibly remelt the cooled iron-core, which shut down the protective magnetic field, by creating volcanoes, possibly from nuclear melt-downs to the core (the mantle of Mars is very thick, and the volcanoes presence has always been a mystery). I hypothesized that they arranged the volcanoes in a geometric pattern that also acted as a "we were here" sign, in case their plan did not work. This clue was solved on March 21,22 2013, in Philadelphia, Pa.

The thought that the Earth's geology could be manipulated was beyond my imagination at the time, and I brushed-off the thoughts.

Looking at a map of North America, to build a case for the origin of the southwestern United States geological history as being from an impact from debree from planet Mars, (probably from the Helles Basin Crator on Mars, largest in the solar system, see book, *Is The Red, Iron-Rich Rock of the Southwest U.S. From Mars; Are Cactus From Mars?*, by D.B.), when was seen a peculiar north/south angular feature in Utah, called, "Combs Ridge". (This was coupled with many strange coincidences and miracles I had been having leading up-to and during the Mars discoveries and on Earth and Stars.) This lead me to think that something divine was going on.

I mistakingly believed that Combs Ridge was 90 degrees North of Easter Island (Early publications printed this, on a big map, they appear to align). None the less, this, and, I felt that the name Easter Island

and Rapa Nui "Navel of the World" was a clue from GOD. A scientific test was in order. So, I got a Mercator projection map and put my protractor on Easter Island, and I asked myself a Scientific Prediction question: If GOD aligned Easter Island, then it should also align mathematically with another known location, such as The Giza Pyramids. Out of the park homerun, the Pyramids are 22.5 degrees from Easter Island. 22.5 is half of 45. That is a math exercise. Further, this 22.5 line also passes north of Mochu Picchu, Peru, at the center-point of a cross of rivers.

The next Scientific Prediction was that the 22.5 angle should show in up-close measurements of these sites. Sure enough, Easter Island's southern peninsulas and a tiny island align at a 22.5 degree angle. More amazing, is the island North and western peninsulas align at 22.5 and 67.5 degrees, making the island a perfect 45./90 triangle, tilted at half of 45 degrees.

The same with Macchu Picchu, the river it is above, is bent at an exact 90 degree angle, and the archeological sites famous Holy Stone sits at 22.5 degrees to the river-bend right-angle point. By the way, the 45 degree from this right angle points to, and travels over, the Stonehenge, England Complex.

The same with the Pyramids of Giza, the plateau itself is manipulated into a triangle shape at the same angle as the great pyramid from ground-level view, 40 degrees. The geometry of the Plateau is the key to unlocking the Geometry of the Pyramids, whose 22.5 degree line travels under the Sphinx's right paw.

The next Scientific Prediction to put to the test is that this 22.5 line connecting Easter Island, Macchu Picchu, and the Giza Pyramids passes over the Dead Sea, or, Salt Sea, the lowest point on Earth, and right through the Holy Land. Sure enough, the shores of the Salt Sea have the same straight-line appearance of the shores of Easter Island, the River of Mocchu Picchu, and the Giza Plateau. And, when a ruler is placed on these shores, aligning the peninsulas at the mathematical angles of everything else. The north shore of the Salt Sea is at 4 degrees, which allows the other lines to be 67.5 degrees and 90 (this 4 degree line has a story all unto itself with many famous sites on this line), and it points to the northern-most point of the Old Wall of Jerusalem.

Scientific Prediction tells us that Old Jerusalem should have the same patterns as Easter Rapa Nui Island, Mocchu Picchu, and Giza, and it sure does. Remarkable, is that the Holy Dome of the Rock and The Western wall, and, The Dome of the Church of Jesus's Sepulcher, and other Holy sites all align with the same angles as the others. This is GOD writing us a letter, and Scientific Predictions and the Law of Odds, and the basic math, tell us this with surety, undebunkable.

Scientific Predictions from these facts tell us that all the Holy Sites of the World are aligned together, and these books show us that this is true.

90 degrees south of the Giza Plateau, is the one of the oldest complexes built by man, Great Zimbabwe, and 22.5 degrees from here is the Dine' Holy Mountain At the Center of the World. 90 degrees south of that is the eastern-most tip of Easter Island. 67.5 degrees from Great Zimbabwe is Stonehenge Complex in England. The Island of England is tilted at exactly 67.5 degrees. The Holy Mountains of China align, as does Mecca, Anghor Wat, Amritsar, Lhassa, and Moundville, Alabama, and Chicago, everything, too many to mention, here.

With the mathematical alignments of the world's religious Holy sites, and all the history of conflict, this unavoidable fact shows that this is all not just a puzzle to reveal HIMSELF, it also makes this geometric puzzle into a World Peace Plan, which was the intention of GOD all along.

For this mathematical pattern is also seen in the stars, the famous constellations, nebulas, galaxies, and the entire Cosmos. Which itself has also been prophesied by the world's ancient histories and texts. Further telling the story of our uniting and defeating evil. (see Sports Prophecies of the Stars for the complete story)

3. Results:

The repeated mathematical angles of 67.5 degrees and 22.5 degrees, and other mathematical divisors of a 360 degree protractor, first introduced in Easter Rapa Nui Island, and displayed uniformly in the geology and archeology in all the famous sites from around the world, and the cosmos, that match exactly to the histories and lore of the very sites the lines pass-over and connect to, show that this is all the work of GOD, an intelligence far beyond our imagination can comprehend. And this entity has shaped our geology, and even our histories, and movements, and borders, all over the world. All in a way that people can understand, using simple math and symbolism, in a scale that can not be ignored. Using signs created billions of years ago, to signs created today.

4. Discussion:

These papers are just a brief summary of a story that will take volumes, and possibly an entire

library/museum to contain. They not only reveal GOD's message, but open-up an entire new field of science and religion study. This paper is but scratching the surface of an even greater riddle to solve. The more you know, the more intense this message becomes. The Astro-radio-burst that arrived at Arecibo, Puerto Rico on Aug,17,2017 gives us a clue to how this message is both new, and, millions and billions of years in the making. (Seeing the evidence presented here, one can also say that the Being that made all this, could also have easily made all this in 6,000 years, as well. Perhaps to further baffle our greatest scientist.)

These papers and the evidence GOD constructed, show us that our ancient religious texts and stories are true, and so are the prophesies in them. The way this message is built, with Easter Island at the center and start and ending, clearly show that JESUS was GOD's Son, that HE sent to Earth, to teach us how to behave. We should all be in fear of GOD, for our world is full of inequity, injustice, wars, violence, sex, materialism, idol (phone/tech) worship, pollution, and the very concept of truth is ignored and smeared.
