Abstract: This paper is written mostly for developing countries like India. Even developed countries may also implement some of the reforms proposed by the author. By birth all are equal. Nature has provided all resources. In some nations like the USA, Canada, UK, Norway, Sweden, Denmark, Holland, many of the European Union, all the Gulf countries and maybe in some other nations people do live above the poverty line. These are all developed countries. In developing countries, still people are struggling to meet their needs. Also, these masses are facing social injustice, all kinds of suppressions, corruption, unemployment, etc. Keeping these problems in mind, the author introduces some economic and administrative reforms for immediate implementation.

Keywords: Administrative Reforms, Economic Development, Social Justice.

Introduction

Before the election for Indian Parliament in 2019, the author wrote to the leading political parties the following administrative and economic implementations. Only two parties acknowledged the author's letter. But unfortunately, they have not prepared to consider the reforms appealed by the author. The salient features of that manifesto are given below:

One

The village agricultural laborers and workers will be paid by the government. Yes, hereafter, they are government employees. Each male and female will get Rupees 500 and Rupees 300 respectively per day.

Two

The government will feed DINNER freely for the senior citizens daily.

Three

The government will aid a sum of Rupees 1000 per month for each and every senior citizen.

Four

All education is FREE from LKG to PhD. All the technical courses [Engineering, Medical and other Allied Areas] are also free of fees.

Five

The government will take over all the educational institutions.

Six

Each unemployed graduate will get an aid of 5000 Rupees per month; and an unemployed post graduate will get an aid of 7500 Rupees per month.

Seven

The unemployed youth will get from 5 lacs to 10 lacs Rupees FREE OF INTEREST to start a business.

Eight

The government will donate a sum of Rupees 10000 for each unemployed graduate and post graduates for their marriage.

Nine

The government will supply freely for ration card holders SUGAR, TEA, COFFEE, WASHING SOAP, and BATHING SOAP AND TOOTH POWDERS. The government will give monthly to each and every citizen 5 Kg. salt ages and 5Kg. Arabian DATES. The undernourishment of the people must be eradicated. Also, the government will come forward to offer an amount of 500 Rupees to every family per month towards COOKING gas cylinders.

Ten

50% reservations for females in private and governmental jobs are to be implemented. In India, the females are higher than the males in number.

Eleven

Currently, the private hospitals, hotels and lawyers charge a VER HUGE amount from patrons/clients. The government will make necessary enforcements and these will be put under severe surveillance.

Twelve

The government will eradicate corruption in all walks of life.

Thirteen

The government will take all the necessary steps and actions to locate and seize BLACK MONEY.

Fourteen

If an MLA and MP fail to do his/her duties, the voters will be given RIGHT to recall their elected MLAS and MPs.

Fifteen

Each and every Indian citizen will have the legal right to file a case against all ministers, MLAs, MPs, other elected bodies, Prime Minister and President of India. No need to get written permission from the Governor and President of India. This will certainly create a fear for the ruling group.

Sixteen

The state headquarters will be shifted to village sides. Even important offices such as COURTS should be moved to villages. Let us recall what is happening in the USA. New York is the largest city in America. But a small town namely Buff allow is the Capital of New York state. Similarly not Los Angeles or San Francisco but it is Sacramento which is the capital of California State.

Seventeen

Now there is a centralized power system in India. De-centralized administrative reforms will be carried out to SPEED UP the administration.

Eighteen

All the RIVERS will be unified/integrated to avoid water scarcity disputes.

Nineteen

A new foreign policy will be framed to meet the challenges and threats.

Twenty

The waste lands will be distributed to the landless people.

Twenty One

More and more branches of taluk courts, district courts, High Courts and Supreme Courts will be established in different zones of the country. This will hasten the PROMPT disposal of cases. Presently, even in taluk courts cases normally come for hearing after 7 – 8 years after filing the cases. Let us recall the famous proverb that justice delayed is justice denied.

Twenty Two

The salaries of MLs, MPs and ministers will be CUT to size.

Twenty Three

Except the armed, navy, air force and other relevant rescue forces like police, all the other government employees will be excluded from pension rights.

Twenty Four

If an MLA, MP, minister, executives and all other employees found guilty of corruption and nepotism, they will be sentenced to a rigorous imprisonment of 50 long years.

Twenty Five

Each Indian citizen will not be entitled to own more than TEN acres of agricultural land.

Twenty Six

No Indian SHOULD is allowed to own/buy more than TWO houses both in a village and other towns/cities.

Twenty Seven

Black marketers and black money holders will be punished severely, very severely, in every way. They will be imprisoned to a maximum of 60 to 70 long years.

Twenty Eight

The mass will be given full democratic freedom to criticize the functioning of all the government departments. But at the same time the persons engaging in tarnishing a government official or department should be punished severely.

Twenty Nine

To know the pulses of the people, each government staff should work minimum one month in agricultural farms and factories. NO full time officers and no full time peons.

Thirty

The Holy Bible, the Holy Quran, Santana Dharma and all other spiritual schools of thought do not permit money lending for interest. The majority of the private money lending organizations are exploiting the people too much. Instead of ending poverty they end prosperity. So, such business must be abolished like the abolishment of privy purses to the ex rulers of our country. Let us recall a money lender like SHERLOCK HOLMES was the reason for Hitler becoming a dictator.

Discussion

There are good MLAs, nice MPs, pure ministers, straight forward governmental officers and employers. In some departments, the administration is very good. For example, Indian postal and telegraph, defense forces, police department and Indian judiciary. The above thirty points are only for anti nationals. The author is bound to recognize the better persons.

These 30 proposals are good in principle but is it possible to implement them. No ruler can implement all these suddenly. But it is certainly a realty and easy to implement one by one. The author likes to appeal to implement the first proposal which states:

The village agricultural laborers and workers will be paid by the government. Yes, hereafter, they are government employees. Each male and female will get Rupees 500 and Rupees 300 respectively per day.

In many countries the agricultural workers do not get proper wages to run their families and educate their children. Moreover, the constitutional rights are refusing for these masses. Mahatma Gandhi gave much importance to agriculture and villages. Soviet Russia failed to give importance to agriculture and villages. That's why the system miserably failed.

A problematic problem is also there. How to increase the revenue to implement the above mentioned 30 economic cum administrative reforms? The author is sleeping on this challenge. The author is going to INVENT the good ways and means to increase revenue for the governments.

The author's first preference is the villages and agricultural daily wagers. The author will certainly tell a number of novel ideas and concepts in the next paper.

Basically, the author is a research scientist in mathematics, physics, cosmology, alternative yoga and alternative medicine. The author has published a number of articles in peer reviewed journals. The fifth Euclidean postulate is mathematical impossibility. The angle trisection is an antic problem. The author has found several solutions on these topics and published papers in professional international journals. Two of extraordinary articles authored by the author have been indexed and abstracted by the Mathematical Reviews of the American Mathematical Society. Also, four of the author's published works have been included in the world famous INSPIRES HEP.

The readers and experts may ask why a scientist enters into economics and administration. The reason is that scientific advancement becomes meaningless if there is no good administration and nice economy in a nation.

Let us bring to our memory what Napoleon said," The word impossible should be taken away from history."

And the greatest scientist Einstein time and again used to tell: "Imagination is more important than knowledge."

So, the author who has solved two mathematical impossibilities is able to propose solutions to the thirty issues raised by the author with the cooperation of good people.
